Guide to Linux Installation and Administration Nicholas Wells, Nick Wells, 2003. Guide to Linux Installation and Administration Second Edition is a hands on practical guide that can be used to master installing and administering Linux in preparation for taking Linux certification exams from LPI and SAIR GNU. This book begins by introducing operating system concepts with a brief history of Linux and the Free Software movement then moves into user oriented tasks such as logging in using the graphical interface and navigating the file system from a command line or graphical file manager. Later chapters cover tasks such as user account management file system setup and management backup strategies and basic shell scripting. Throughout the book each topic is supported by thorough explanations and real world examples review questions hands on projects and extensive case projects.

I Series Stephen Haag, James T. Perry, Amy Phillips, 2002. The I Series Applications textbooks strongly emphasize that students learn and master applications skills by being actively engaged by doing. These texts have been written with clear error free and unambiguous steps to accomplish tasks that lead to a finished document worksheet or database table. The authors made the decision that teaching how to accomplish some task is not enough for complete understanding and mastery. Prior to introducing steps the authors discuss why the steps students are about to experience are important and what role the steps play in the overall plan for creating a document workbook or database.
