Fast Politics Laura Pérez Rastrilla, Pablo Sapag M., Armando Recio García, 2023-10-17 The goal of this book is to show the role of TikTok as a tool for political purposes To this end the authors analyse the messages posted on this social medium by political figures and institutions such as politicians and political parties their impact on political landscapes as well as the transformation of political communication techniques in order to suit the platform s features In the last two years the exponential growth of TikTok has led an increasing number of politicians and institutions to incorporate it into their communication strategies The platform displays some very different features from other social media that determine the way in which the content is presented In addition it manages to reach an audience that normally does not access or share political messages Within this context the volume pursues two main objectives First to examine how the communication techniques and the peculiarities of this social medium where short videos with actors in informal attitudes prevail affect the political message A second objective is to analyse the influence of the messages distributed through TikTok that redefine political scenarios and of the relationships of politicians and parties with voters The core of the book comprises case studies that are organised into three parts with nine chapters in all The authors are scholars and practitioners of political communication with diverse geographical representation who approach the topics from a range of methodological perspectives The first part addresses the state of the art and the influence of TikTok features on the way political communication is performed The second part discusses the influence of TikTok on electoral scenarios and political culture in India Bangladesh the United States and Ecuador Finally in the third part TikTok is analysed as an instrument for promoting far right politicians and parties in Europe as in the case of Matteo Salvini in Italy and AfD in Germany and Vox in Spain The volume is oriented to both scholars and communication professionals such as journalists communication consultants and speechwriters who want to become familiar with the platform learn about its political impact or wish to deepen their understanding of transformations in communication techniques and their adaptation to this growing social medium Chapter 2 The Moving Body as the Articulator Meme and Affective Link in Political Communication on TikTok is available open access under a Creative Commons Attribution 4 0 International License via link springer com

Democracy in the Disinformation Age Regina Luttrell, Lu Xiao, Jon Glass, 2021-05-23 In this book established researchers draw on a range of theoretical and empirical perspectives to examine social media s impact on American politics Chapters critically examine activism in the digital age fake news online influence messaging tactics news transparency and authentication consumers digital habits and ultimately the societal impacts that continue to be created by combining social media and politics Through this book readers will better understand and approach with questions such as How exactly and why did social media become a powerful factor in politics What responsibilities do social networks have in the proliferation of factually wrong and hate filled messages Or should individuals be held accountable What are the state of the art of computational techniques for measuring and determining social media s impact on society What role does online activism

play in today's political arena. What does the potent combination of social media and politics truly mean for the future of democracy? The insights and debates found herein provide a stronger understanding of the core issues and steer us toward improved curriculum and research aimed at a better democracy. *Democracy in the Disinformation Age: Influence and Activism in American Politics* will appeal to both undergraduate and postgraduate students as well as academics with an interest in areas including political science, media studies, mass communication, PR, and journalism. **Narrative Theory in**

Journalistic Practice Yngve Benestad Hågvar, Harald Hornmoen, Jørgen Alnæs, 2025-11-28. *Narrative Theory in Journalistic Practice* provides innovative analytical frameworks for examining journalistic narratives in today's digital multimodal media landscape. The volume expands beyond traditional models focused on linear texts to address contemporary formats across multiple platforms. Through empirical analyses of genres such as immersive long-form stories, live news reports, social media news, podcasts, and still images, the book explores the dual function of journalistic narratives: they are suited to engage readers in both trivial and complex events and issues, but will also advance certain interpretations of reality and downplay others. The book conveys a critical and constructivist view on narratives, showing how journalistic stories contribute to shaping people's understanding of reality, but also how media users play an active role in interpreting the narratives. The volume will interest students and scholars of journalism, media studies, and narrative studies. It is intended for use by graduate students as well as by established researchers. *Four Battlegrounds* Paul Scharre, 2023-02-28. An NPR 2023 Books We Love Pick. One of the Next Big Idea Club's Must Read Books. An invaluable primer to arguably the most important driver of change for our future. P. W. Singer, author of *Burn In*. An award-winning defense expert tells the story of today's great power rivalry: the struggle to control artificial intelligence. A new industrial revolution has begun. Like mechanization or electricity before it, artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power, especially among the AI superpowers: China, the United States, and Europe. Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game-changing technology and dominate the future. *Four Battlegrounds* argues that four key elements define this struggle: data, computing power, talent, and institutions. Data is a vital resource, like coal or oil, but it must be collected and refined. Advanced computer chips are the essence of computing power; control over chip supply chains grants leverage over rivals. Talent is about people: which country attracts the best researchers and most advanced technology companies? The fourth battlefield is, maybe, the most critical: the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy, society, and especially their military. Scharre's account surges with futuristic technology. He explores the ways AI systems are already discovering new strategies via millions of war game simulations, developing combat tactics better than any human, tracking billions of people using biometrics, and subtly controlling information with secret algorithms. He visits China's National Team of leading AI companies to show the chilling synergy between China's government, private sector, and surveillance state. He interviews

Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order *Spiralling: No boyfriend. New skills are necessary to create advertising that builds brand and sales. In his latest book Vaynerchuk argues that today's fast growing businesses brands content creators and influencers have one thing in common. They mastered storytelling in areas of underpriced attention which predominantly exists across a handful of social media platforms. Informed by 20 years of business and marketing success he contends that the biggest transformation and opportunity is the TikTokification of Social Media. Increasingly platforms are distributing content based on what users are interested in rather than who they follow. In *Day Trading Attention* Gary offers detailed advice on how small businesses large corporations and creators can understand attention what it is where it is where it's underpriced and how to leverage it. Der Spiegel Rudolf Augstein, 2020 **The Canadian Teacher ...** Gideon E. Henderson, Matthew Parkinson, 1914 *The Practice of Attention* Cody Cook-Parrott, 2026-03-17 A deeply personal invitation to reclaim your focus as a radical act of self care and creative resistance. When our attention splinters so do we. It is not an exaggeration to say this book will save your life. It saved mine. Holly Whitaker New York Times bestselling author of *Quit Like a Woman*. It's no secret that our attention is fractured. We look for distraction anytime we have a spare moment or feel bored or uncomfortable. We yearn to be fully immersed in the moment whether for deep work or pleasure but we have almost forgotten how. In *The Practice of Attention* beloved artist and teacher Cody Cook Parrott offers a vulnerable exploration of how they overcame social media and technology addiction sharing their road map for reclaiming the most precious of resources our time. For Cody digital distractions shared parallels with alcohol and other addictions trying to escape painful parts of life through dopamine hits and other highs. Social media use enabled workaholism and distraction from real life and tough choices. After working through the practices in this book Cody permanently deleted their Instagram account which had over 80 000 followers so they are now free of the comparison the doom scrolling and the constant back and forth. But you don't have to delete social media to benefit from the suggestions in this book. With a focus on the art of presence rather than the science of productivity Cody encourages you to investigate what you're avoiding and who benefits when you distract yourself. Conduct an Attention Audit to understand where you place your focus and lose it throughout the day and the week. Implement a Digital Detox in ways that feel nourishing and meaningful. Cultivate daily rituals rather than routines. Nurture

practices that bring fun play and spaciousness into your life including hobbies movement creativity research and being of service Foster curiosity and devotion and letting go of perfectionism and people pleasing Shifting our attention has profound power on how we experience ourselves and those around us Cody writes This is my wish that you feel less pull toward your screen and more pull toward your life
