The Challenge of Protein Crops as a Sustainable Source of Food and Feed for the Future Antonio M. De Ron, Francesca Sparvoli, José J. Pueyo, Didier Bazile, 2017-05-03 Grain legumes together with quinoa and amaranth pseudocereals and other crops are attractive candidates to satisfy the growing demand for plant protein production worldwide for food and feed Despite their high value many protein crops have not been adequately assessed and numerous species are underutilized Special attention has to be paid to genetic diversity and landraces and to the key limiting factors affecting yield including water deficiency and other abiotic and biotic stresses in order to obtain stable reliable and sustainable crop production through the introduction and local adaptation of genetically improved varieties Legumes the main protein crops worldwide contribute to the sustainable improvement of the environment due to their ability to fix nitrogen and their beneficial effects on the soil They play a key role in the crop diversification and sustainable intensification of agriculture particularly in light of new and urgent challenges such as climate change and food security In addition the role of legumes in nutrition has been recognized as a relevant source of plant protein together with other benefits for health Chapters dealing with common bean lupine soybean lentil cowpea and Medicago are included in this book Most contributions deal with legumes but the significant number of papers on different aspects of quinoa gives an idea of the increasing importance of this protein crop Pseudocereals such as quinoa and amaranth are good sources of proteins Quinoa and amaranth seeds contain lysine an essential amino acid that is limited in other grains Nutritional evaluations of quinoa indicate that it constitutes a source of complete protein with a good balance among all of the amino acids needed for human diet and also important minerals vitamins high quality oils and flavonoids Other protein crops also included in this book are hemp cotton and cereals maize wheat and rice Although cereals protein content is not high their seeds are largely used for human consumption In this book are included articles dealing with all different aspects of protein crops including nutritional value breeding genetic diversity biotic and abiotic stress cropping systems or omics which may be considered crucial to help provide the plant proteins of the future Overall the participation of 169 authors in 29 chapters in this book indicates an active scientific community in the field which appears to be an encouraging reflect of the global awareness of the need for sustainability and the promising future of proteins crops as a

Water Policy in Pakistan Mahmood Ahmad,2023-09-26 The water policy issues are well documented in a large set of reports and studies completed over time showing that the policy prescription and its implementation has been weak in the past as this book reveals The key reforms initiated were lost due to a lack of government s will and commitment and more so by pervasive political economy of water Given this background each chapter in the book follows a balanced approach in seeking and evaluating alternate solutions to water management issues especially improvements in water governance and tackling new challenges emerging from the climate change in the short and long term This approach underpins the importance of moving from the culture of piloting projects to actual implementation on an impact oriented scale The book would also highlight that most of the water solutions lie outside the water sector such as agriculture population economy etc Post COVID 19 policies are exploring new food health nexus that calls for nature based solutions for our future agriculture growth The book would show case pioneer work underway in Pakistan on how new policy discourse can reduce water use in agriculture without investing in expensive water technology and infrastructure thus saving enough water for other competing purposes Farm Journal ,1999 *Farmers and Consumers Market Bulletin* ,2011 **Weed Technology** ,2004
