Nature-Inspired Methods for Smart Healthcare Systems and Medical Data Ahmed M. Anter, Mohamed Elhoseny, Anuradha D. Thakare, 2023-12-01 This book aims to gather high quality research papers on developing theories frameworks architectures and algorithms for solving complex challenges in smart healthcare applications for real industry use It explores the recent theoretical and practical applications of metaheuristics and optimization in various smart healthcare contexts The book also discusses the capability of optimization techniques to obtain optimal parameters in ML and DL technologies It provides an open platform for academics and engineers to share their unique ideas and investigate the potential convergence of existing systems and advanced metaheuristic algorithms The book s outcome will enable decision makers and practitioners to select suitable optimization approaches for scheduling patients in crowded environments with minimized human errors The healthcare system aims to improve the lives of disabled elderly sick individuals and children IoT based systems simplify decision making and task automation offering an automated foundation Nature inspired metaheuristics and mining algorithms are crucial for healthcare applications reducing costs increasing efficiency enabling accurate data analysis and enhancing patient care Metaheuristics improve algorithm performance and address challenges in data mining and ML making them essential in healthcare research Real time IoT based healthcare systems can be modeled using an IoT based metaheuristic approach to generate optimal solutions Metaheuristics are powerful technologies for optimization problems in healthcare systems They balance exact methods which guarantee optimal solutions but require significant computational resources with fast but low quality greedy methods Metaheuristic algorithms find better solutions while minimizing computational time The scientific community is increasingly interested in metaheuristics incorporating techniques from AI operations research and soft computing New metaheuristicsoffer efficient ways to address optimization problems and tackle unsolved challenges They can be parameterized to control performance and adjust the trade off between solution quality and resource utilization Metaheuristics manage the trade off between performance and solution quality making them highly applicable to real time applications with pragmatic objectives
