Hiring Manager  
XYZ, Inc.  
45 Business Street  
Jobville, USA 01234

Dear Hiring Manager: XYZ, Inc.

I'm writing to you in regards to your associate engineer position which was brought to my attention through ~~pure-fucking-magic~~. This posting calls for a driven student of engineering who thrives in a fast paced and dynamic workplace. My tenacious passion for aerospace, embedded electronics, and avionics makes me an excellent fit for consideration within XYZ, Inc.

As an engineer, I am constantly in a position to learn and develop new ideas. To have the opportunity to be exposed to engineering challenges and be able to provide fresh perspective by applying the technical and design skills I have acquired is extremely exciting. My coursework has given me the knowledge to be effective in designing and working with electrical systems and my previous projects, work experience, and engineering endeavors allow me the skills and mentality for complex problem solving.

My prior work experience validates my work ethic, highlights my leadership skill, and emphasizes my abilities in a technical environment. I was most recently employed with Small Automotive, Inc. as an electrical engineering intern working as team lead and technical reference for internal product development. I have many accomplishments from my time at Small Automotive, Inc:

- Lead a team of three to develop a flexible and user-friendly piece of test and validation equipment.
- Developed and characterized custom electrical hardware and firmware solutions for sensing, communication, and digital processing.
- I was regularly commended for both my technical and leadership abilities by the director of my department.

My experiences at Small Automotive, Inc. were only possible through overcoming the unique challenges that placed me in a leadership role as a new and unproven electrical engineering intern. The lessons learned in small-scale system development from this internship compliment and fill the voids from my experiences working with Big Defense Co. on massively complex radar and missile defense systems.

Included with this letter is a copy of my resume and an application to the position. If you wish to contact me to set up an interview or other inquiry I can be reached at the given email address or phone number. Thank you very much for taking the time to review my application, I hope to hear from you soon for consideration in this position within XYZ, Inc.

Respectfully Yours,

*How To Write Amazing Cover Letters* The Hyperink Team,2012-02-12 ABOUT THE BOOK If a resume is a window into your past work experience a cover letter is the tool you use to install it Cover letters were once just an after thought something most people used to simply regurgitate their resumes In fact it wasn't until the last decade that cover letters gained wide acceptance and importance Today not only is the cover letter just as important as a resume it can be the deciding factor in whether a hiring manager looks at your resume or throws it in the trash But how do you write the kind of amazing cover letter that will get you in the door How can you create a narrative of your professional experience that makes the HR person sit up and take notice The key is knowing how to present yourself It does not matter if you've spent 30 years in the work force or are just entering it the fact remains that you need to learn to how convince someone else to interview you MEET THE AUTHOR The Hyperink Team works hard to bring you high quality engaging fun content If ever you have any questions about our products or suggestions for how we can make them better please don't hesitate to contact us Happy reading EXCERPT FROM THE BOOK You've probably figured out a few mistakes to avoid already but you'd probably be surprised at what many employers are turned off by when reading cover letters Lack of proofreading This is a no brainer but many people often miss them or don't bother to spell check before sending out the cover letter and resume It's always a good idea to ask a friend or family member to check your letter for spelling errors and typos to give you a fresh perspective Not including the name of the hiring manager If you don't know who is going to read your cover letter and resume try to find out

When in doubt call the company and ask who the person in charge of that department is so you can target your letter appropriately Not writing to an audience Focus each letter on each employer According to Career Builder 44 percent of executives polled said it s common for applicants to use their cover letters to show they ve learned more about the job Doing so can give you an edge against the competition Failing to sell yourself If you undersell your skills and qualifications you won t make an impression on the reader Don t just talk about your accomplishments give concrete examples Regurgitating the resume Cover letters weren t meant as a tool to repeat everything that s in your resume It s a tool to build on it and an opportunity to correlate your experience with the job you re applying for Include any training classes awards and recognition you ve received in the past that might give you an edge over the competition Buy a copy to keep reading
