Computational Intelligence: Soft Computing and Fuzzy-Neuro Integration with Applications Okyay Kaynak, Lotfi A. Zadeh, Burhan Türksen, Imre J. Rudas, 1998-08-20

Soft computing is a consortium of computing methodologies that provide a foundation for the conception design and deployment of intelligent systems and aims to formalize the human ability to make rational decisions in an environment of uncertainty and imprecision This book is based on a NATO Advanced Study Institute held in 1996 on soft computing and its applications The distinguished contributors consider the principal constituents of soft computing namely fuzzy logic neurocomputing genetic computing and probabilistic reasoning the relations between them and their fusion in industrial applications Two areas emphasized in the book are how to achieve a synergistic combination of the main constituents of soft computing and how the combination can be used to achieve a high Machine Intelligence Quotient

Soft Computing and Its Applications

Rafik Aziz ogly Aliev, R. R. Aliev, 2001 The concept of soft computing is still in its initial stages of crystallization Presently available books on soft computing are merely collections of chapters or articles about different aspects of the field This book

is the first to provide a systematic account of the major concepts and methodologies of soft computing presenting a unified framework that makes the subject more accessible to students and practitioners Particularly worthy of note is the inclusion of a wealth of information about neuro fuzzy neuro genetic fuzzy genetic and neuro fuzzy genetic systems with many illuminating applications and examples [Explainable Neural Networks Based on Fuzzy Logic and Multi-criteria Decision Tools](#) József Dombi,Orsolya Csiszár,2021-06-03 The research presented in this book shows how combining deep neural networks with a special class of fuzzy logical rules and multi criteria decision tools can make deep neural networks more interpretable and even in many cases more efficient Fuzzy logic together with multi criteria decision making tools provides very powerful tools for modeling human thinking Based on their common theoretical basis we propose a consistent framework for modeling human thinking by using the tools of all three fields fuzzy logic multi criteria decision making and deep learning to help reduce the black box nature of neural models a challenge that is of vital importance to the whole research community *Soft Computing* Andrea Tettamanzi,Marco Tomassini,2013-04-17 Soft computing encompasses various computational methodologies which unlike conventional algorithms are tolerant of imprecision uncertainty and partial truth Soft computing technologies offer adaptability as a characteristic feature and thus permit the tracking of a problem through a changing environment Besides some recent developments in areas like rough sets and probabilistic networks fuzzy logic evolutionary algorithms and artificial neural networks are core ingredients of soft computing which are all bio inspired and can easily be combined synergetically This book presents a well balanced integration of fuzzy logic evolutionary computing and neural information processing The three constituents are introduced to the reader systematically and brought together in differentiated combinations step by step The text was developed from courses given by the authors and offers numerous illustrations as **Genetic Algorithms And Fuzzy Logic Systems Soft Computing Perspectives** Elie Sanchez,Takanori Shibata,Lotfi A Zadeh,1997-03-15 Ever since fuzzy logic was introduced by Lotfi Zadeh in the mid sixties and genetic algorithms by John Holland in the early seventies these two fields widely been subjects of academic research the world over During the last few years they have been experiencing extremely rapid growth in the industrial world where they have been shown to be very effective in solving real world problems These two substantial fields together with neurocomputing techniques are recognized as major parts of soft computing a set of computing technologies already riding the waves of the next century to produce the human centered intelligent systems of tomorrow the collection of papers presented in this book shows the way The book also contains an extensive bibliography on fuzzy logic and genetic algorithms [Knowledge-Based Neurocomputing: A Fuzzy Logic Approach](#) Eyal Kolman,Michael Margaliot,2008-10-18 In this monograph the authors introduce a novel fuzzy rule base referred to as the Fuzzy All permutations Rule Base FARB They show that inferring the FARB using standard tools from fuzzy logic theory yields an input output map that is mathematically equivalent to that of an artificial neural network Conversely every standard artificial neural network has an equivalent FARB

The FARB ANN equivalence integrates the merits of symbolic fuzzy rule bases and sub symbolic artificial neural networks and yields a new approach for knowledge based neurocomputing in artificial neural networks
