**BGP Secure Routing Extension (BGP-SRx)** Oliver Borchert,2021 In this paper we first describe the problem space Following that we describe the design and implementation of the NIST reference implementation for RPKI based route origin validation BGP OV and BGPsec path validation BGP PV within a BGP router The system we developed is called BGP Secure Routing Extension BGP SRx We describe the system design explain the design choices communications between all components and present the performance measurements obtained during the implementation stages This paper is organized so that it first explains the high level system design with a brief explanation of all components and how they interact We will explain why we chose this design and provide a discussion of its benefits as well as shortcomings Furthermore we show which open source components we chose and how we extended them for this project The BGP SRx implementation is a reference implementation for RPKI OV with all its router side components as specified in RFC 6811 RFC 6810 and RFC 8210 as well as for BGPsec path validation as specified in RFC 8205 and RFC 8608 The implementation allowed early identification of issues while the specifications were still under development hence provided important feedback to the development of the different IETF RFCs

**Big Book of Border Gateway Protocol (BGP) RFCs** ,2000 This work looks at Border Gateway Protocol and shows how it defines how backbone routing i e routing on a line carrying data gathered from smaller lines is carried out on the Internet or large intranets extranets BGP differs from its alternatives in that it is an industrial strength routing protocol suitable for use in high bandwidth backbone environments Soon all non local internet traffic will be routed via BGP and as intranets extranets become more complet BGP should become even more in the corporate environment

*VXLAN Fabric with BGP EVPN Control-Plane* Toni Pasanen,2020-09-05 The intent of this book is to explain various design models for Overlay Network and Underlay Network used in VXLAN Fabric with BGP EVPN Control Plane The first two chapters are focusing on the Underlay Network solution The OSPF is introduced first Among other things the book explains how OSPF flooding can be minimized with area design After OSPF there is a chapter about BGP in the Underlay network Both OSPF and BGP are covered deeply and things like convergence are discussed After the Underlay Network part the book focuses on BGP design It explains the following models a BGP Multi AS with OSPF Underlay this chapter discusses two design models Shared Spine ASN and Unique Spien ASN b BGP Only Multi ASN where both direct and loopback overlay BGP peering models are explained c Single ASN with OSPF Underlay d Hybrid ASN with OSPF Underlay Pod specific shared ASN connected via Super Spine layer using eBGP peering e Dual ASN model where leafs share the same ASN and spines share their ASN Each of the design model chapters includes a Complexity Map that should help readers to understand the complexity of each solution This book also explains BGP ECMP and related to ECMP the book also covers ESI Multihoming The last chapter introduces how two Pods can also be geographically dispersed DCs can be connected using Layer 3 only DCI with MPLS I am using 5 stage Clos topology throughout the book Some solutions are though explained by using only three switches for the sake of simplicity I am also using IP Only Underlay Network with Ingress Replication so this book does not cover Underlay Network Multicast solution Besides I am not covering DCI using Layer 2 Border Gateway BGW or Overlay Tenant Routing Multicast solution in this book because those among the Underlay Multicast solutions are covered in my first book Virtual Extensible LAN VXLAN A Practical Guide to VXLAN solution that is available at Amazon and Leanpub I wanted to keep the focus of the book fairly narrow and concentrate on the Control Plane design and functionality Please be aware that this book does not give any recommendation to which solution is the best and which is not It is the readers responsibility to find that out and selects the best solution for their needs The book includes 66 images 260 configuration show command examples and 32 packet captures
