Designing for Democracy Jennifer Forestal,2022 How should we fix digital technologies to support democracy instead of undermining it In *Designing for Democracy* Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment a primary component of our modern public square structures our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires While many scholars and practitioners are attentive to the role of design in shaping behavior they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them Forestal closes this gap by providing a new theory of democratic space Drawing from a wide range of disciplines including architecture psychology and the history of political thought she argues that democratic spaces must be designed with three environmental characteristics boundaries durability and flexibility that taken together afford users the ability to engage in fundamental civic practices Through extended analyses of Facebook Twitter and Reddit Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces as well as more concrete suggestions for how to improve them In connecting the built environment digital technologies and democratic theory *Designing for Democracy* provides blueprints for democracy in a digital age

The Oracle Year Charles Soule, 2018-04-03 Here's my prediction: this book will seep into your soul. **The Oracle Year** is about knowing the future and what you do with that knowledge. As you meet Will Dando, you can't help but reevaluate yourself. Get ready for the best kind of fun. Brad Meltzer, New York Times bestselling author of *The Inner Circle*. From bestselling comic book franchise writer Charles Soule comes a clever and witty first novel of a twentysomething New Yorker who wakes up one morning with the power to predict the future. Knowledge is power. So when an unassuming Manhattan bassist named Will Dando awakens from a dream one morning with 108 predictions about the future in his head, he rapidly finds himself the most powerful man in the world. Protecting his anonymity by calling himself the Oracle, he sets up a heavily guarded Web site with the help of his friend Hamza to selectively announce his revelations. In no time, global corporations are offering him millions for exclusive access, eager to profit from his prophecies. He's also making a lot of high-powered enemies: from the President of the United States and a nationally prominent televangelist to a warlord with a nuclear missile and an assassin grandmother. Legions of cyber spies are unleashed to hack the Site as it's come to be called, and the best manhunters' money can buy are deployed not only to unmask the Oracle but to take him out of the game entirely. With only a handful of people he can trust, including a beautiful journalist, it's all Will can do to simply survive, elude exposure, and protect those he loves long enough to use his knowledge to save the world. Delivering fast-paced adventure on a global scale as well as sharp-witted satire on our concepts of power and faith, Marvel writer Charles Soule's audacious debut novel takes readers on a rollicking ride where it's impossible to predict what will happen next.
