

## Gradient concept

In addition to color selection, you can also drag across the color bar to apply a gradient to objects.

1 With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Color** to apply a default gradient. Drag across your object to create a custom path for the gradient.

2 Drag across the artwork to change the length and direction of the gradient path and drag the midpoint marker to change the midpoint of the gradient between the current color.

3 Rotate the circle along the axis to apply a blue gradient to the object, which can then be moved along the gradient path.

An alternative to an address to working with gradients directly on the object, there is a **Gradients** editor available from the **Color** window in the toolbar. This **Gradients** editor gives you high precision drag positioning as well as a few additional options.

For all work with **Elliptical** and **Radial** gradients, a **Gradients** editor is available from the **Color** window. To create a gradient, click the **Gradients** button on the toolbar. The **Gradients** editor is available in the **Color** & **Gradients** window.
