## **Hydropower Projects Environmental Social Impacts:**

*Assessing the Environmental Impacts of Hydropower Projects* Robert Zwahlen, 2022-01-03 This book describes the entire process of environmental impact assessment for hydropower and dam projects not from a legal or regulatory point of view but from a very applied one based mainly on the personal experience of the author who is involved in this field of work since over 40 years by describing the different steps of such an assessment covering all major aspects to be dealt with The focus is on environmental issues while the other main subject social impacts is mentioned here only briefly It will be of interest not only for ESIA Environmental and Social Impact Assessment practitioners be they consultants involved in the preparation of such studies or staff members of environmental protection agencies having to come to decisions based on them but also for engineers and planners involved in such projects developers and people interested in questions related to energy environment and climate change Overall this book aims at contributing to put the discussion about hydropower and dam projects on a more objective level

*Hydropower in the New Millennium* B. Honningsvag, G.H. Midttomme, K. Repp, K. Vaskinn, T. Westeren, 2001-01-01 The power sector has undergone a liberalization process both in industrialized and developing countries involving market regimes as well as ownership structure These processes have called for new and innovative concepts affecting both the operation of existing hydropower plants and transmission facilities as well as the development and implementation of new projects At the same time a sharper focus is being placed on environmental considerations In this context it is important to emphasize the obvious benefits of hydropower as a clean renewable and sustainable energy source It is however also relevant to focus on the impact on the local environment during the planning and operation of hydropower plants New knowledge and methods have been developed that make it possible to mitigate the local undesirable effects of such projects Development and operation of modern power systems require sophisticated technology Continuous research and development in this field is therefore crucial to maintaining hydropower as a competitive and environmentally well accepted form of power generation

**The Social Challenges and Opportunities of Low Carbon Development** Johan Nordensvärd, 2016-10-04 This book explores the social implications and challenges of low carbon development The argument of the book is that a broad understanding of low carbon development is essential for mitigating climate change and enabling development in a carbon constrained world but there are risks that low carbon development might come at a price that is both social and economic These risks need to be carefully assessed and reduced The main aim of the book is to explore critically analyse and propose different ways of understanding low carbon development from a social perspective in both developed and developing countries The author uses concepts such as low carbon development social policy sustainable development and environmental justice to understand the social implications of low carbon development projects The book first elaborates the need to understand the social issues and challenges of low carbon development in both developed and developing countries It then discusses five contemporary challenges of low

carbon development the social consequences of Chinese hydropower dams in the Mekong region the cost of the transition to renewable energies such as wind energy in Germany the challenges of carbon offsetting in Brazil the nexus of fuel inefficient housing and fuel poverty in England solar power for refugees in Africa The book fills a crucial gap for researchers postgraduates practitioners and policy makers in the fields of climate change development and social policy Johan Nordensvard is a Lecturer in Social Policy at the University of Southampton UK Climate Change 2022 - Mitigation of Climate Change Intergovernmental Panel on Climate Change (IPCC),2023-08-17 This Working Group III contribution to the IPCC Sixth Assessment Report provides a comprehensive and transparent assessment of the literature on climate change mitigation The report assesses progress in climate change mitigation options for reducing emissions and enhancing sinks With greenhouse gas emissions at the highest levels in human history this report provides options to achieve net zero as pledged by many countries The report highlights for the first time the social and demand side aspects of climate mitigation and assesses the literature on human behaviour lifestyle and culture and its implications for mitigation action It brings a wide range of disciplines notably from the social sciences within the scope of the assessment IPCC reports are a trusted source for decision makers policymakers and stakeholders at all levels international regional national local and in all branches government businesses NGOs Available as Open Access on Cambridge Core **Water and Society VI S.** Mambretti,2021-07-19 Over the centuries civilisations have relied on the availability of clean and inexpensive water This can no longer be taken for granted as the need for water continues to increase due to the pressure from a growing global population demanding higher living standards Agriculture and industry major users of water are at the same time those that contribute to its contamination Water distribution networks in urban areas as well as soiled water collection systems present serious problems in response to a growing population as well as the need to maintain ageing infrastructures Many technologically feasible solutions such as desalination or pumping systems are energy demanding but as costs rise the techniques currently developed may need to be re assessed The socio political implications of a world short of clean easily available water are enormous It will lead to realignments in international politics and the emergence of new centres of power in the world Policymakers need to be educated and advised on developing policies and regulations that will support the water systems of tomorrow The role of society and its involvement with water is paramount To meet the future demands for water new standards new training and additional support roles will best be delivered by those knowledgeable of the new technologies and direction of the industry This volume highlights research on issues related to the nature of water and its use and exploitation by society **Foreign Operations, Export Financing, and Related Programs Appropriations for 2002** United States.
