

Chapter 1

1.1 - Introduction to Cell Biology

<p>What is cell theory?</p>	<ul style="list-style-type: none"> - Cells are the fundamental building blocks of all living organisms - Cells are the basic units of life - Cells are derived from other cells (by cell division)
<p>Explain the three types of cell division.</p>	<ol style="list-style-type: none"> 1. Mitosis - two identical daughter cells, occurs in ALL body cells. Allows for growth and asexual reproduction in unicellular organisms. 2. Meiosis - four unique daughter cells with ½ DNA and results in sex cells. Allows for sexual reproduction in most multicellular organisms. 3. Binary fission - allows for reproduction in prokaryotes/bacteria cells
<p>What are the eight functions of life?</p>	<p>GHRIMMEN G: Growth H: Homeostasis R: Reproduction I: Irritability/response M: Movement M: Metabolism E: Excretion N: Nutrition</p>
<p>Apply the eight functions of life to paramecium</p>	<p>Growth - increases in size, cytoplasm, # of organelles until cell division Homeostasis - contains contractile vacuoles which regulate water; maintains internal environment through diffusion across the plasma membrane Reproduction - asexual, binary fission Irritability/response - cilia wave and propel cell in reaction to the environment Movement - cilia propels cell around, cytoplasm flows through cell Metabolism - aerobic cellular respiration in</p>

Ib Biology HL Question Bank:

IB World Schools Yearbook 2012 ,2012 **IB World Schools Yearbook 2011** Wendy Bosberry-Scott,2011 This yearbook is the official guide to schools offering the International Baccalaureate Diploma Middle Years and Primary Years programmes It tells you where the schools are and what they offer and provides up to date information about the IB programmes and the International Baccalaureate Organization

Biology for the IB Diploma Andrew Allott,2001 This concise guide provides all the content you need for the IB Diploma in Biology at both Standard and Higher Level Follows the structure of the IB Programme exactly and include all the options Each topic is presented on its own page for clarity Standard and Higher Level material clearly indicated Plenty of practice questions Written with an awareness that English may not be the reader s first language

The United States Catalog ,1925 *Science Policy Under Thatcher* Jon Agar,2019-06-03 Margaret Thatcher was prime minister from 1979 to 1990 during which time her Conservative administration transformed the political landscape of Britain Science Policy under Thatcher is the first book to examine systematically the interplay of science and government under her leadership Thatcher was a working scientist before she became a professional politician and she maintained a close watch on science matters as prime minister Scientific knowledge and advice were important to many urgent issues of the 1980s from late Cold War questions of defence to emerging environmental problems such as acid rain and climate change Drawing on newly released primary sources Jon Agar explores how Thatcher worked with and occasionally against the structures of scientific advice as the scientific aspects of such issues were balanced or conflicted with other demands and values To what extent for example was the freedom of the individual scientist to choose research projects balanced against the desire to secure more commercial applications What was Thatcher s stance towards European scientific collaboration and commitments How did cuts in public expenditure affect the publicly funded research and teaching of universities In weaving together numerous topics including AIDS and bioethics the nuclear industry and strategic defence Agar adds to the picture we have of Thatcher and her radically Conservative agenda and argues that the science policy devised under her leadership not least in relation to industrial strategy had a prolonged influence on the culture of British science
