*Film, Music, Memory* Berthold Hoeckner,2019-11-27 Film has shaped modern society in part by changing its cultures of memory Film Music Memory reveals that this change has rested in no small measure on the mnemonic powers of music As films were consumed by growing American and European audiences their soundtracks became an integral part of individual and collective memory Berthold Hoeckner analyzes three critical processes through which music influenced this new culture of memory storage retrieval and affect Films store memory through an archive of cinematic scores In turn a few bars from a soundtrack instantly recall the image that accompanied them and along with it the affective experience of the movie Hoeckner examines films that reflect directly on memory whether by featuring an amnesic character a traumatic event or a surge of nostalgia As the history of cinema unfolded movies even began to recall their own history through quotations remakes and stories about how cinema contributed to the soundtrack of people s lives Ultimately Film Music Memory demonstrates that music has transformed not only what we remember about the cinematic experience but also how we relate to memory itself *Remembrance of Things Past* Marcel Proust,1929 Five Masters Joseph Wood Krutch,1930 **The Heartsease library** ,1902
