College Rankings Today:

The Alumni Factor The Alumni Factor, 2013-09-10 This book began with a simple premise that there is a better way to assess and rank colleges and universities in America than those currently being offered The primary outcomes of most of today's rankings are 1 To provide readers a view of what life is like as an undergraduate and 2 To give insight into who comes into the college The Alumni Factor on the other hand is more interested in who comes out The aim of this guide is to describe how well a college or university actually develops and shapes its students and what becomes of them after they graduate The Alumni Factor is interested in the actual outcomes experienced by college graduates and the role their college played in creating those outcomes The Alumni Factor believes this information regarding graduate outcomes is truly essential to understanding and assessing our colleges and universities today In line with these goals The Alumni Factor provides a detailed in depth profile of graduates from 225 of our nation's top colleges The profiles were constructed almost entirely with data and insights from the actual college alumni themselves Readers will find The Alumni Factor to be a fascinating look at the incredibly diverse academic social and cultural choices available to capable students today The

and III will explore these aspects of college rankings respectively In light of the historical lessons revealed in Section I however movements that seek to reform college rankings should be focused on producing better rankings rather than on trying to eliminate or ignore them Section IV will survey multiple new indicators of academic quality that many view as potential improvements over the indicators upon which current college rankings are based Contains 2 figures 6 tables and 116 endnotes
