

Ladder and Functional Block Programming

by Stefan

The word *ladder programming* comes from the word *Programmable Logic Controller* (PLC) by Simon, 1969. <https://doi.org/10.1002/9781118151111.ch01>, which explains why the word *controller* is present in many PLC-related books. “Technological advances in recent years have resulted in the development of the programmable logic controller (PLC) and a corresponding evolution of ladder programming.” (Simon, 1969). The ladder program term is from the book edited in 2000.

The idea of the ladder is something of a mixture between an electrical circuit or relay-based architecture for programmable logic controllers and also at least the basis of providing sequential control. It has been associated with programmable logic controllers. It addresses the problem of different programmable control methods being using different architectures and program forms for describing the principal structure and illustrating their own concepts from a point of view of controllers.

In some the reader is showing the ability necessary to write programs for programmable logic controllers, using ladder structures, ladder-like operations and functions are included in the book with various and all available functions and operations given at the end of the book.

Now, *Programmable Logic Controller* is included in the volume of PLCs, and so, it can be in connection with this chapter is included here. The volume is single PLC-related book, although it is not a book that something is learned more or less at some stage in the course. It can be further PLC's book, and it explains ladder and other structures of sequential programming languages and algorithms, an approach called “ladder programming” and developed. It is in a book for programmers to create programs
