### **Green Chemistry in Industry** Mark Anthony Benvenuto, Heinz

Plaumann, 2018-09-24 The greening of industry processes i e making them more sustainable is a popular and often lucrative trend which has emerged over recent years The 3rd volume of Green Chemical Processing considers sustainable chemistry in the context of corporate interests The American Chemical Society's 12 Principles of Green Chemistry are woven throughout this text as well as the series to which this book belongs

### Green Urea Noorhana Yahya, 2018-01-16 This book presents a

game changing technology of lower energy intensive urea production of urea which is used as fertilizer The technology from a resource to a knowledge intensive based industry investigates a new synthesis approach employing electromagnetic induction and nano catalyst at lower energy consumption This clean and green method for a sustainable future might change the landscape of future chemical processes It is made possible due to the enhancement in nanotechnology where quantum mechanical understanding is called into play New reactor designs are elaborated on and discussed explicitly Hematite and nickel oxide nanocatalysts are proposed for the green urea synthesis process in the presence of static and oscillating magnetic fields Strategies to increase single to triplet conversion rate are given for better understanding of the improved urea rate The focus is deliberately on scrutinizing the greenhouse gas effect on the urea yield in this case CO<sub>2</sub> flow rate Coating techniques for slow release strategies are provided to reduce the volatilization of ammonia and leaching effect hence offering a complete solution of Green Technology Agriculture 4.0 that creates the new patterns and precision monitoring of crop rotation and livestock utilization will be able to pave the way for better crop yield Development of advanced technology in agriculture is important for the implementation of Agriculture 4.0 and currently an inevitable trend of the socioeconomic development in the context of broader international integration for the sustainable future The author would like to acknowledge Ministry of Higher Education MOHE for the grant worth RM 12 million to accomplish Green and Economical Urea project and to have full understanding on Green Technology in Urea This book is a collaborative effort by her colleagues Ku Zilati Khanif Shahrina Zainovia Azizah Zakaria and who have carried out the research over the past five years
