The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

*Human Development and Interaction in the Age of Ubiquitous Technology* Rahman, Hakikur, 2016-06-27 The human condition is affected by numerous factors in modern society In modern times technology is so integrated into culture that it has become necessary to perform even daily functions *Human Development and Interaction in the Age of Ubiquitous Technology* is an authoritative reference source for the latest scholarly research on the widespread integration of

technological innovations around the globe and examines how human computer interaction affects various aspects of people's lives. Featuring emergent research from theoretical perspectives and case studies, this book is ideally designed for professionals, students, practitioners, and academicians.

**The Business of Higher Education** John C. Knapp Ph.D., David J. Siegel, 2009-10-22. At a time of great economic uncertainty, *The Business of Higher Education* looks at the pros and cons of colleges and universities taking a more business-like approach to fulfilling their missions. How can colleges and universities navigate their way between shrinking commitments and the increasing expectations of their students? Does the answer lie in taking a more business-like approach? This extraordinary resource considers the costs and benefits to both public and private institutions and to society when academe embraces business models for improving cost efficiency, marketing, hiring practices, and customer service. Bringing together a diverse team of contributors from the academic and business worlds, *The Business of Higher Education* offers 35 essays in three volumes. The first volume explores issues of leadership and culture; the second focuses on management and fiscal strategies; and the third volume takes up issues of marketing and consumer interests. Throughout the work, it balances the contrasting perspectives of those within the academy and those outside of it as it considers whether higher education and the public interest are ultimately helped or harmed by the application of business methods to essential academic functions.
