## **Chapter 2 The Fertile Crescent:**

*American Adventurism Abroad* Michael J. Sullivan, 2004-08-30 This book provides a comparative analysis of 30 American interventions into Third World countries. An historical approach is used to place the featured cases into a more general history of American Diplomacy. The author uses his assessments to prove that U S foreign policy has been driven by the goal of being the ultimate power in the global capitalist economic system. The author makes his work unique by giving a critical view of America's place in the world during an anticipated time of war and raised patriotism. He provides a scholarly look at U S diplomacy leading up to the era of the War on Terror. Sullivan explains how over the past 50 years the U S has come to succeed Europe as ruler of the global economic system. The political systems which have been promoted by the U S to preserve worldwide capitalism range from one party rule to monarchies and recurring civil war. The interventions discussed have proved to be short term successes for U S policy but more often tragic for the local societies affected. Sullivan draws on his 1996 release *Comparing State Polities* to create a number of tables that place U S involvement into geographic and hierarchic perspective. The reader is ultimately provided with a provocative thesis that challenges traditional interpretations of America's role in the world. This book will be an asset to any undergraduate college student taking classes in political science or history. It will also appeal to a general audience.

**Ancient Civilizations** Edie Evans, 2002-11 Where can students visit an Egyptian pyramid, learn the Sumerian number system, study the ancient Chinese dynasties, and explore the Mayan city of Chichen Itza? The Internet, of course. Armed with reproducible graphic organizers, students go online and hone their research skills to learn about these and other ancient civilizations. Students then use what they've learned to recreate a Mayan calendar, map out Mesopotamia, create a timeline of ancient Greece, and more.

[The State of Social Progress of Islamic Societies](#) Habib Tiliouine, Richard J. Estes, 2016-04-08 This handbook addresses the historical background of the Islamic world and reviews its basic past intellectual achievements. It studies social progress of these regions and sub regions in comparison with other parts of the world. It uses large data sets and well established statistically weighted Indexes in order to assess the nature and pace of the multiple facets of social change in member states of the Organization of Islamic Cooperation (OIC). The handbook extensively discusses the main challenges confronting the Islamic nations in the social, economic, political, and ideological fields. Though it is recognizable that social change in the Islamic World is generally positive, it remains highly variable in pace and there is room to speed it up to the benefit of millions of deprived Muslim people. Hence the book studies the different propositions and programs of action such as the United Nations Millennium Development Campaign and the OIC's Ten Year Programme of Action to present an integrated and comprehensive agenda of action to help improve the situation in the Islamic World.
