Chapter 7 Freshwater Ecosystem Services:

Water Management Shimon C. Anisfeld, 2024-06-27 Water Management fills a critical gap providing a base of knowledge to understand and manage complex water problems. It is geared primarily towards students at the undergraduate and graduate levels but will also be a helpful resource for practicing water professionals who are looking for new ideas or a broader view of the subject. This text explores the entire gamut of water issues from dams to desalination from prior appropriation to pumped storage from sanitation to stormwater. Rather than teaching from one disciplinary perspective, it examines water through a variety of lenses: hydrology, climate science, ecology, and engineering, but also law, economics, history, and environmental justice. The result is a comprehensive introduction to one of the most demanding challenges of our time: developing just and sustainable solutions to water management.

Aquatic Functional Biodiversity Andrea Belgrano, Guy Woodward, Ute Jacob, 2015-07-25 Aquatic Functional Biodiversity: An Ecological and Evolutionary Perspective provides a general conceptual framework by some of the most prominent investigators in the field for how to link evolutionary approaches with functional diversity to understand and conserve the provisioning of ecosystem services in aquatic systems. Rather than producing another methodological book, the editors and authors primarily concentrate on defining common grounds, connecting conceptual frameworks, and providing examples by a more detailed discussion of a few empirical studies and projects which illustrate key ideas and an outline of potential future directions and challenges that are expected in this interdisciplinary research field. Recent years have seen an explosion of interest in using network approaches to disentangle the relationship between biodiversity, community structure, and functioning. Novel methods for model construction are being developed constantly, and modern methods allow for the inclusion of almost any type of explanatory variable that can be correlated either with biodiversity or ecosystem functioning. As a result, these models have been widely used in ecology, conservation, and eco-evolutionary biology. Nevertheless, there remains a considerable gap on how well these approaches are feasible to understand the mechanisms on how biodiversity constrains the provisioning of ecosystem services. Defines common theoretical grounds in terms of terminology and conceptual issues. Connects theory and practice in ecology and eco-evolutionary sciences. Provides examples for successful biodiversity conservation and ecosystem service management.

Our Earth Matters Bharat H. Desai, 2021-06-15 On 21 May 2019, it was officially recognized that we are now living in the Anthropocene, our Earth's latest geological epoch named for the unmistakable imprint of human activities. This announcement came almost 60 years after the publication of Rachel Carson's landmark work of environmental writing, *Silent Spring*, and next year 2022 it will be 50 years since the first UN Conference on the Human Environment held in Stockholm in June 1972. This book, *Our Earth Matters: Pathways to a Better Common Environmental Future*, is a special issue of the journal *Environmental Policy and Law*, which was first published in 1975. It presents 21 invited contributions by outstanding scholars from around the world which examine existing global regulatory approaches, processes, instruments, and institutions for the

protection of the global environment The articles are grouped under four headings Prognoses Processes Problematique and Prospects and in them the authors have sought to explore answers to the existential environmental crisis They urge us to ponder our reckless destruction of natural spaces endangering of plant and animal species poisoning of the environment and general disturbance of our essential ecological processes The primary objective of the book is to raise the awareness of the global audience by inspiring scholars and decision makers to re examine current global approaches to environmental issues and explore the future trajectory with new ideas and frameworks for international environmental governance in the 21st century and beyond The book will be of interest to all those working to secure the sustainable future of the human race on our only abode planet Earth Bharat H Desai is Professor of International Law and Jawaharlal Nehru Chair in International Environmental Law Centre for International Legal Studies School of International Studies Jawaharlal Nehru University New Delhi Editor in Chief of the journal Environmental Policy Law Amsterdam IOS Press and of the Yearbook of International Environmental Law Oxford OUP
