Django Rufus Stewart, 2020-10-20 There has been an increase in the need for web apps however most programming languages which support app development are complex This means that longer periods of time are spent while developing these apps Python has a framework called Django which provides web developers with a mechanism to develop web apps in an easy and quick manner So it's a good idea for you to learn how to use this framework for the development of web apps all of which is explained in this book Make sure that you install Python 2.6.5 or higher Enjoy reading This book will save you time On many occasions we've seen clever students get stuck spending hours trying to fight with Django and other aspects of web development More often than not the problem was usually because a key piece of information was not provided or something was not made clear While the occasional blip might set you back 10-15 minutes sometimes they can take hours to resolve We've tried to remove as many of these hurdles as possible This will mean you can get on with developing your application instead of stumbling along This book will lower the learning curve Web application frameworks can save you a lot of hassle and a lot of time Well that is if you know how to use them in the first place Often the learning curve is steep This book tries to get you going and going fast by explaining how all the pieces fit together This book will improve your workflow Using web application frameworks requires you to pick up and run with a particular design pattern so you only have to fill in certain pieces in certain places After working with many students we heard lots of complaints about using web application frameworks specifically about how they take control away from them i.e. inversion of control To help you we've created a number of workflows to focus your development process so that you can regain that sense of control and build your web application in a disciplined manner This book is not designed to be read Whatever you do do not read this book It is a hands-on guide to building web applications in Django Reading is not doing To increase the value you gain from this experience go through and develop the application When you code up the application

do not just cut and paste the code Type it in think about what it does then read the explanations we have provided to describe what is going on If you still do not understand then check out the Django documentation go to Stack Overflow or other helpful websites and fill in this gap in your knowledge
