Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement. These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming. It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part. Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review, news reporting, parody or satire or research or study. When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content's infringing nature. Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking. End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions.

Power to the Players Rob Smat, 2023-11-21 Prepare yourself for the ultimate expos of the retail trading revolution. The sea shanties, YOLOs and red bandanas were just the beginning. Did you know Robinhood didn't actually initiate the infamous trading halt? Or why Redditors refer to 2021 as the sneeze rather than the squeeze? And what if I told you that some shares in your brokerage account might be counterfeits? If not buckle up. Witness firsthand the real and utterly ludicrous hivemind that brought Wall Street to its knees in January 2021 and discover why GameStop was only the beginning of an even more unprecedented retail contagion, one that will challenge everything you think you know about our markets all over again. If the meme mania of 2021 drew blood from Wall Street, what follows is the Shakespearean realization that Reddit's blade was in fact poisoned. In a digital world where information is frequently deleted, revised and buried, accurately piecing together events is nearly impossible. While other authors and journalists have understandably struggled, Rob Smat offers a clear and unfiltered account having witnessed every twist of the GameStop phenomenon firsthand. *Power to the Players* is as much an unabridged history of the GameStop sneeze as it is a roadmap of how retail traders regrouped when everyone else thought the story had ended in calamity. The truest of diamond hands never sold and their power has only grown stronger since. Before Redditors were merely a nuisance to the status quo, now they're poised to upend it completely.
