**Communicate for a Change** Lori Carrell, Robert Zemsky, 2021-09-28 This is a different kind of book a call for courageous conversations focusing on nine taboo subjects that bedevil higher education For nearly a decade distinguished scholars Lori Carrell and Robert Zemsky have been having frank conversations with each other and with colleagues and friends about the state of higher education In *Communicate for a Change* they bring together nine of their most insightful conversations to explore difficult questions that today's administrators trustees and faculty members too frequently avoid Why Carrell and Zemsky ask is it so hard to talk about the mess that higher education is in And how can we refocus the conversation on what really matters grappling with taboo subjects in a way that helps to revitalize higher education from the inside out Grounded in the real as opposed to the rhetorical importance of community in making change these revealing conversations also explore why the public no longer sees faculty as heroes and experts how to overcome the academy's fondness for slogans how money talks why curricular change doesn't usually happen the students we hardly know and how we might come to know them better how to constructively approach differences of race and gender and much more A golden thread weaves its way through the book revealing the premise that rich honest talk can generate trust connection and fresh ideas for revolutionary change Carrell the chancellor of the University of Minnesota Rochester is by both training and instinct a testifier Learning for her is tangible a product of truly getting dirty sorting through the muck of conflict as well as connection Zemsky on the other hand is a provocateur who pushes an argument as a means to explore differences and conflicts Both are natural storytellers Their conversations are enriched by the contributions of a host of higher education experts and leaders Breaking new ground in terms of both its subject matter and its format *Communicate for a Change* is an accessible and engaging catalyst that will kick start subsequent deliberations

**Meganets** David B. Auerbach, 2023-03-14 How the autonomous digital forces jolting our lives as uncontrollable as the weather and plate tectonics are transforming life society culture and politics David Auerbach's exploration of the phenomenon he has identified as the meganet begins with a simple startling revelation There is no hand on the tiller of some of the largest global digital forces that influence our daily lives from corporate sites such as Facebook Amazon Google YouTube Instagram and Reddit to the burgeoning metaverse encompassing cryptocurrencies and online gaming to government systems such as China's Social Credit System and India's Aadhaar As we increasingly integrate our society culture and politics within a hyper networked fabric Auerbach explains how the interactions of billions of people with unfathomably large online networks have produced a new sort of beast ever changing systems that operate beyond the control of the individuals companies and governments that created them Meganets Auerbach explains have a life of their own actively resisting attempts to control them as they accumulate data and produce spontaneous unexpected social groups and uprisings that could not have even existed twenty years ago And they constantly modify themselves in response to user behavior resulting in collectively authored algorithms none of us intend or

control These enormous invisible organisms exerting great force on our lives are the new minds of the world increasingly commandeering our daily lives and inner realities Auerbach's analysis of these gargantuan opaque digital forces yield important insights such as The conventional wisdom that the Googles and Facebook of this world are tightly run algorithmic entities is a myth No one is really in control The efforts at reform to get lies and misinformation off meganets run into a brick wall because the companies and executives who run them are trapped by the persistent evolving and opaque systems they have created Bitcoin and other cryptocurrencies are uncontrollable and their embrace by elite financial institutions threatens the entire economy We are asking the wrong questions in assuming that if only the Facebooks of this world could be better regulated or broken up that they would be better more ethical citizens Why questions such as making algorithms fair and bias free and whether AI can be a tool for good or evil are wrong and misinformed Auerbach then comes full circle showing that while we cannot ultimately control meganets we can tame them through the counterintuitive measures he describes in detail
