An Introduction to Community Development Rhonda Phillips, Robert Pittman, 2014-11-26. Beginning with the foundations of community development, *An Introduction to Community Development* offers a comprehensive and practical approach to planning for communities. Road tested in the authors' own teaching and through the training they provide for practicing planners, it enables students to begin making connections between academic study and practical know-how from both private and public sector contexts. *An Introduction to Community Development* shows how planners can utilize local economic interests and integrate finance and marketing considerations into their strategy. Most importantly, the book is strongly focused on outcomes, encouraging students to ask what is best practice when it comes to planning for communities and how do we accurately measure the results of planning practice. This newly revised and updated edition includes increased coverage of sustainability issues, discussion of localism and its relation to community development, quality of life, community well-being, and public health considerations, and content on local food systems. Each chapter provides a range of reading materials for the student, supplemented with text boxes, a chapter outline, keywords, and reference lists, and new skills based exercises at the end of each chapter to help students turn their learning into action, making this the most user friendly text for community development now available.

Multiple-Criteria Decision-Making (MCDM) Techniques and Statistics in Marketing Tarnanidis, Theodore, Papathanasiou, Jason, Ismyrlis, Vasileios, Kittu Manda, Vijaya, 2025-03-13. Marketing has become increasingly popular, utilizing multi-criteria decision making (MCDM) methods and statistics to create robust frameworks for making informed and strategic decisions. Computational and modeling breakthroughs have resulted in a significant increase in the use of MCDM methods in marketing in the past decade, making it an ideal solution for many marketing problems. Statistics can now be used to conduct MCDM analyses on a variety of marketing problems, including new product introduction and pricing, using multiple data sources. Businesses can make more informed, strategic, and effective decisions by using MCDM methods and statistical analysis in marketing. By using these tools, marketers can improve market performance.
