Sleep Hacks World Series Update:

Hack's 191 Bill Chastain, 2012-01-24 Hack Wilson's record 191 RBIs in 1930 may well stand the test of time and so may the record of his hard drinking lifestyle. In Hack's 191 Bill Chastain recreates the most productive offensive season in baseball history while giving readers unique insight into the life of one of baseball's most fascinating enigmatic and yet neglected characters. Drunk or sober, Wilson lived large in Prohibition era Chicago where the entertainment and nightclub industries thrived and Al Capone, a friend of Wilson, reigned as the most publicized gangster in America. Hack finished the 1929 season batting 345 with 39 home runs and 159 RBIs, giving him his fourth consecutive 100 plus RBI season before, for misplaying two fly balls in the World Series. Despite losing the Series, the Cubs entered the 1930 season favored again to win the National League pennant. After a slow start and many bad breaks, the team was in first place by the end of August with Hack Wilson leading the way. Chronicling the ups, downs, and record setting accomplishments of Lewis R. Hack Wilson, this book returns, arguably, the most hard living, hard hitting ballplayer in history to the lineup of the game's greats.

Playthings, 1929 **Textbook of Palliative Care** Roderick Duncan MacLeod, Lieve Van den Block, 2025-02-25 This second edition provides the most up to date information on all aspects of palliative care including recent developments including COVID 19 global policies, service provision, symptom management, professional aspects, organization of services, palliative care for specific populations, palliative care emergencies, ethical issues in palliative care, research in palliative care, public health approaches, and financial aspects of care. This new **Textbook of Palliative Care** remains a unique, comprehensive, clinically relevant, and state of the art book aimed at advancing palliative care as a science, a clinical practice, and as an art. Palliative care has been part of healthcare for over fifty years, but it still needs to be explained to many. Healthcare education and training has been slow to recognize the vital importance of ensuring that all practitioners have a good understanding of what is involved in the care of people with serious or advanced illnesses and their families. However, the science of palliative care is advancing, and this new edition will contribute to a better understanding. This new edition offers 86 updated or new chapters out of 108, written by experts in their given fields, providing up to date information on a wide range of topics of relevance to those providing care towards the end of life, no matter what the disease may be. We present a global perspective on contemporary and classic issues in palliative care, with authors from a wide range of disciplines involved in this essential aspect of care. The **Textbook** includes sections addressing aspects such as symptom management and care provision, organization of care in different settings, care in specific disease groups, palliative care emergencies, ethics, public health approaches, and research in palliative care. This new **Textbook** will be of value to practitioners in all disciplines and professions where the care of people approaching death is important, specialists as well as non-specialists, in any setting where people with serious, advanced illnesses are residing. It is also an important resource for researchers, policy, and decision makers at national or regional levels. Neither the science nor the art of palliative care will stand still, so the Editors and

contributors from all over the world aim to keep this Textbook updated so that the reader can find new evidence and approaches to care
