Soap Web Services Springer:

Perspectives on Web Services Olaf Zimmermann, Stefan Peuser, Mark Tomlinson, 2005 , **Securing Web Services: Practical Usage of Standards and Specifications** Periorellis, Panos, 2007-10-31 This book collects a complete set of studies addressing the security and dependability challenges of Web services and the development of protocols to meet them Encompassing a complete range of topics including specifications for message level security transactions and identity management it enables libraries to provide researchers an authoritative guide to a most challenging technological topic Provided by publisher *Enterprise Information Systems: Concepts, Methodologies, Tools and Applications* Management Association, Information Resources, 2010-09-30 This three volume collection titled *Enterprise Information Systems Concepts Methodologies Tools and Applications* provides a complete assessment of the latest developments in enterprise information systems research including development design and emerging methodologies Experts in the field cover all aspects of enterprise resource planning ERP e commerce and organizational social and technological implications of enterprise information systems **Advanced Computing Applications, Databases and Networks** S.A Begum, 2011-05-13 **ADVANCED COMPUTING APPLICATIONS DATABASES AND NETWORKS** focuses on new developments and advances in three major areas of Computer Science The first part presents some significant contributions and surveys major research areas of Advanced Computing Applications viz Natural Language Processing Medical Imaging Soft Computing Methodologies and a wide variety of its application domains The second part explains different approaches towards development of Unified Theoretical Model for Database Mining Dimension Reduction of higher dimensional data and the applicability of Soft Computing Methodologies in Data Mining and Clustering The third part provides the approaches taken to address the challenging problems in the areas of Wired and Wireless Networks The chapters in this volume are representative of recent research efforts and advances in the area of Advanced Computing Applications Databases and Networks covering both theoretical and application issues *Handbook of Network and System Administration* Jan Bergstra, Mark Burgess, 2011-08-11 System administration is about the design running and maintenance of human computer systems Examples of human computer systems include business enterprises service institutions and any extensive machinery that is operated by or interacts with human beings System administration is often thought of as the technological side of a system the architecture construction and optimization of the collaborating parts but it also occasionally touches on softer factors such as user assistance help desks ethical considerations in deploying a system and the larger implications of its design for others who come into contact with it This book summarizes the state of research and practice in this emerging field of network and system administration in an anthology of chapters written by the top academics in the field The authors include members of the IST EMANICS Network of Excellence in Network Management This book will be a valuable reference work for researchers and senior system managers wanting to understand the essentials of system administration whether in

practical application of a data center or in the design of new systems and data centers Covers data center planning and design Discusses configuration management Illustrates business modeling and system administration Provides the latest theoretical developments *Software System Reliability and Security* M. Broy, Johannes Grünbauer, Charles Antony Richard Hoare, 2007 To make communication and computation secure against catastrophic failure and malicious interference it is essential to build secure software systems and methods for their development This book describes the ideas on how to meet these challenges in software engineering Computational Intelligence Applications in Business Intelligence and Big Data Analytics Vijayan Sugumaran, Arun Kumar Sangaiah, Arunkumar Thangavelu, 2017-06-26 There are a number of books on computational intelligence CI but they tend to cover a broad range of CI paradigms and algorithms rather than provide an in depth exploration in learning and adaptive mechanisms This book sets its focus on CI based architectures modeling case studies and applications in big data analytics and business intelligence The intended audiences of this book are scientists professionals researchers and academicians who deal with the new challenges and advances in the specific areas mentioned above Designers and developers of applications in these areas can learn from other experts and colleagues through this book

Web Services Security and E-business G. Radhamani, G. S. V. Radha Krishna Rao, 2007 Many techniques algorithms protocols and tools have been developed in the different aspects of cyber security namely authentication access control availability integrity privacy confidentiality and non repudiation as they apply to both networks and systems Web Services Security and E Business focuses on architectures and protocols while bringing together the understanding of security problems related to the protocols and applications of the Internet and the contemporary solutions to these problems Web Services Security and E Business provides insight into uncovering the security risks of dynamically created content and how proper content management can greatly improve the overall security It also studies the security lifecycle and how to respond to an attack as well as the problems of site hijacking and phishing **Information Modelling and Knowledge Bases**

XXIX V. Sornlertlamvanich, P. Chawakitchareon, A. Hansuebsai, 2018-02-09 Information modelling and knowledge bases have become ever more essential in recent years because of the need to handle and process the vast amounts of data which now form part of everyday life The machine to machine communication of the Internet of Things IoT in particular can generate unexpectedly large amounts of raw data This book presents the proceedings of the 27th International Conference on Information Modelling and Knowledge Bases EJC2017 held in Krabi Thailand in June 2017 The EJC conferences originally began in 1982 as a co operative initiative between Japan and Finland but have since become a world wide research forum bringing together researchers and practitioners in information modelling and knowledge bases for the exchange of scientific results and achievements Of the 42 papers submitted 29 were selected for publication here and these cover a wide range of information modelling topics including the theory of concepts semantic computing data mining context based information retrieval ontological technology image databases temporal and spatial databases document data management software

engineering cross cultural computing environmental analysis social networks and WWW information The book will be of interest to all those whose work involves dealing with large amounts of data **Emerging Informatics** Shah Jahan

Miah,2012-04-20 The book on emerging informatics brings together the new concepts and applications that will help define and outline problem solving methods and features in designing business and human systems It covers international aspects of information systems design in which many relevant technologies are introduced for the welfare of human and business systems This initiative can be viewed as an emergent area of informatics that helps better conceptualise and design new world class solutions The book provides four flexible sections that accommodate total of fourteen chapters The section specifies learning contexts in emerging fields Each chapter presents a clear basis through the problem conception and its applicable technological solutions I hope this will help further exploration of knowledge in the informatics discipline **A**

Handbook of Information Technology Bubu Bhuyan,2007 This handbook on information technology aims to bring together views of professors industry experts researchers and student learners from across all barriers to a common platform for the discussion and propagation of knowledge on the latest breakthroughs in the fields of information technology
