Ali Arslan, 2005 Turkey has a strategic place in world politics As Ahmad 1991 226 and 1993 said Turkey s strategic location on the Straits and on the cross roads between Europe and Asia will remain unchanged Turkey is a meeting point between Europe and Asia not only geographically but also ideologically between Eastern and Western civilisation The Turkish secular and democratic system has provided a model to both the Islamic Middle East and the new Turkish states of the former Soviet Union The new state was created from the ruins of the Ottoman Empire in 1920s Turkey has turned her face completely to the west since the foundation of the Republic The economic and social development as Hale examined Hale 1981 have proceeded in a predominantly liberal competitive political system since the 1940s This paper will concern itself with the Turkish political leaders Firstly a brief information about the political structure of contemporary Turkey will be given Then the major findings on Turkish top political elites will be presented The top political elites comprise all the presidents presidents of the TGNA prime ministers and ministers who served in three or more cabinets during the whole modern Republican history of Turkey In doing this the variables of age educational level education type occupation foreign languages gender and marital status family size were used *Political Elites and Political Development in the Middle East* Frank Tachau, 1975 Monographic collection of essays on elites in the political systems in the Middle East with emphasis on traditional culture and modernization includes bibliographys maps references and statistical tables **Turkish Political Elites** D. Turkish-Qatari Relations Özgür Pala, Khalid Al-Jaber, 2022-04-04 This book examines domestic and regional geopolitical dynamics behind Turkish Qatari relations from the past to the present Utilizing arguments of practical geopolitical reasoning z g r Pala and Khaled Al Jaber situate their analysis of evolving relations in the contexts of Ottoman British geopolitical rivalry in the Persian Gulf the Turkish Republic s fluctuating relations with the Middle East until the 2000s the AKP governments opening to the region and finally the Arab Spring and its aftermath Contextualizing the trajectory of Turkish Qatari relations within the larger Middle East and the Gulf Arab region the authors argue that material interests and identity politics have generally determined relations until the turn of the millennium Under Erdogan and Sheikh Hamad s assertive leadership and ambitious foreign policy Turkey and Qatar came to witness various foreign policy convergences on critically important regional issues Pala and Al Jaber argue that these convergences coupled with their geopolitical and security goals facilitated a political alignment between Ankara and Doha throughout the Arab Spring They argue that despite facing major geopolitical setbacks Turkey and Qatar were able to chart a much deeper cooperation which

later evolved into a strategic partnership in various areas *National Elections in Turkey* F. Michael Wuthrich, 2015-07-28

What determines voting behavior in Turkey At a time when the center right religious conservative leadership of the Justice and Development Party has dominated government and the political scene in Turkey so much so that the democratic credentials of the regime have come into question many have sought to understand what undergirds this party's success at the polls While many scholars have argued that elections in Turkey over time can be effectively and simply explained by static social or cultural cleavages Wuthrich challenges these assertions with a framework that carefully attends to patterns of strategic vote getting behavior in elections by political parties and their leaders Using the campaign speeches of the political elite election data at national and provincial levels and careful observations of voter mobilization strategies across time Wuthrich traces four distinct patterns that explain important shifts in electoral behavior He covers the first free and fair multiparty election in 1950 and follows campaign strategies through 2011 highlighting and explaining the potential development of a new and more problematic paradigm emerging in the post 2007 environment Structural Change in Turkish Society Mübeccel Belik Kıray, 1991

Contesting Cosmopolitan Europe James Foley, Umut Korkut, 2025-10-01

The project of European integration has undergone a succession of shocks beginning with the Eurozone crisis followed by reactions to the sudden growth of irregular migration and most recently the coronavirus pandemic These shocks have politicised questions related to the governance of borders and markets that for decades had been beyond the realm of contestation For some time these questions have been spilling over into domestic and European electoral politics with the rise of populist and Eurosceptic parties Increasingly however the crises have begun to reshape the liberal narratives that have been central to the European project This book charts the rise of contestation over the meaning of Europe particularly in light of the coronavirus crisis and Brexit Drawing together cutting edge interdisciplinary scholarship from across the continent it questions not merely the traditional conflict between European and nationalist politics but the impact of contestation on the assumed cosmopolitan values of Europe
