**Virtual Competition** Ariel Ezrachi, Maurice E. Stucke, 2016-11-14 A fascinating book about how platform internet companies Amazon Facebook and so on are changing the norms of economic competition Fast Company Shoppers with a bargain hunting impulse and internet access can find a universe of products at their fingertips But is there a dark side to internet commerce This thought provoking expos invites us to explore how sophisticated algorithms and data crunching are changing the nature of market competition and not always for the better Introducing into the policy lexicon terms such as algorithmic collusion behavioral discrimination and super platforms Ariel Ezrachi and Maurice E Stucke explore the resulting impact on competition our democratic ideals our wallets and our well being We owe the authors our deep gratitude for anticipating and explaining the consequences of living in a world in which black boxes collude and leave no trails behind They make it clear that in a world of big data and algorithmic pricing consumers are outgunned and antitrust laws are outdated especially in the United States Science A convincing argument that there can be a darker side to the growth of digital commerce The replacement of the invisible hand of competition by the digitized hand of internet commerce can give rise to anticompetitive behavior that the competition authorities are ill equipped to deal with Burton G Malkiel Wall Street Journal A convincing case for the need to rethink competition law to cope with algorithmic capitalism s potential for malfeasance John Naughton The Observer [The Platform Delusion](#) Jonathan A. Knee, 2021-09-07 An investment banker and professor explains what really drives success in the tech economy Many think that they understand the secrets to the success of the biggest tech companies Facebook Amazon Apple Netflix and Google It s the platform economy or network effects or some other magical power that makes their ultimate world domination inevitable Investment banker and professor Jonathan Knee argues that the truth is much more complicated but entrepreneurs and investors can understand what makes the giants work and learn the keys to lasting success in the digital economy Knee explains what really makes the biggest tech companies work a surprisingly disparate portfolio of structural advantages buttressed by shrewd acquisitions strong management lax regulation and often encouraging the myth that they are invincible to discourage competitors By offering fresh insights into the true sources of strength and very real vulnerabilities of these companies The Platform Delusion shows how investors existing businesses and startups might value them compete with them and imitate them The Platform Delusion demystifies the success of the biggest digital companies in sectors from retail to media to software to hardware offering readers what those companies don t want everyone else to know Knee s insights are invaluable for entrepreneurs and investors in digital businesses seeking to understand what drives resilience and profitability for the long term **AWS Certified Security Study Guide** Mauricio Muñoz, Dario Lucas Goldfarb, Alexandre M. **How Big-Tech Barons Smash Innovation—and How to Strike Back** Ariel Ezrachi, Maurice E. Stucke, 2022-06-28 Two market experts deconstruct the drivers and inhibitors to innovation in the digital economy explain how large tech companies can stifle disruption assess the toll of their technologies on our well being and democracy and outline policy changes to take power away from big tech and return it to entrepreneurs Silicon Valley's genius combined with limited corporate regulation promised a new age of technological innovation in which entrepreneurs would create companies that would in turn fuel unprecedented job growth Yet disruptive innovation has stagnated even as the five leading tech giants which account for approximately 25 percent of the S P 500's market capitalization are expanding to unimaginable scale and power In How Big Tech Barons Smash Innovation and How to Strike Back Ariel Ezrachi and Maurice E Stucke explain why this is happening and what we can do to reverse it While many distrust the Big Tech Barons the prevailing belief is that innovation is thriving online It isn't Rather than disruptive innovations that create significant value we are getting technologies that primarily extract value and reduce well being Using vivid examples and relying on their work in the field the authors explain how the leading tech companies design their sprawling ecosystems to extract more profits while crushing any entrepreneur that poses a threat As a result we get less innovation that benefits us and more innovations that surpass the dreams of yesteryears autocracies The Tech Barons technologies which seek to decode our emotions and thoughts to better manipulate our behavior are undermining political stability and democracy while fueling tribalism and hate But it's not hopeless The authors reveal that sustained innovation scales with cities not companies and that we as a society should profoundly alter our investment strategy and priorities to certain entrepreneurs Tech Pirates and cities infrastructure
