The content reflects both current and future trends, making it relevant for global markets and today's digitally driven economy. This book is especially useful for product managers, entrepreneurs, and business leaders who are keen to refine their strategic planning skills. It offers actionable advice and frameworks that can be applied across various industries, empowering readers to successfully manage digital products and drive business growth.

Mobile Technologies in Libraries Ben

Rawlins, 2016-09-08. The ever-expanding usage of mobile technologies has dramatically changed how we access information and how we as a society expect to access information. With mobile technologies becoming available to an increasing majority of the population, users are constantly connected to information. The rapid expansion of mobile technology has had a profound impact on many different sectors, industries, and institutions; among those that have been affected are libraries. With more users expecting access to information and resources in a mobile-optimized format, libraries have had to adapt to meet the needs of users. This has entailed evaluating various library services and resources to determine how to best meet the needs of mobile users. Additionally, mobile technology has changed the way that websites are designed and has led to an increasing popular type of web design known as responsive web design (RWD). This enables web developers to design websites with one code base that are optimized for a wide range of devices, from desktop computers to smartphones. Libraries must keep their mobile services current or risk becoming obsolete. Based on research, examples, and experience using mobile technology, this book will include topics such as: The impact of mobile technology, Mobile technology and the Digital Divide, Implications for library staff and vendors, Responsive Web Design, Wearable technology in library services. *Mobile Technologies in Libraries: A LITA Guide* is written for library staff interested in how mobile technologies have changed the way we access and expect to access information, as well as how libraries can incorporate and adapt to mobile technology. **Effectual**

Entrepreneurship Saras Sarasvathy, Glen B. Wheatley, 2025-05-27. Whether you come to this book as an entrepreneurship student, a corporate manager, someone seeking regenerative social change, or a seasoned creator of new ventures, you already know that entrepreneurship is the primary engine of growth, innovation, and financial self-reliance. What you will discover in this book is that there is a science to entrepreneurship, a shared logic that can be observed in expert entrepreneurs across industries, geographic locations, and time. We call this logic effectuation, which means working with things already within your control to co-create valuable new futures with people who want to work with you. At the heart of the book, you will find the

four core principles of effectuation that expert entrepreneurs follow when creating new ventures products and markets Start with your means Set affordable loss Form partnerships Leverage contingencies In this book each of these core principles is explained through cases stories thought exercises and a variety of practical applications Presented in the concise modular graphical form made popular in previous editions Effectual Entrepreneurship is perfect both for those seeking to become entrepreneurs and those already in the thick of things A wealth of thought provoking material expert advice and practical techniques resides in these pages and on the accompanying website www.effectuation.org **I'm not a numbers person** Selena Fisk,2022-04-26 Life in the 21st century dictates that you need to know your numbers and use them to improve your decision making and enhance your impact From organizing the home budget tracking health understanding social media metrics to running multi national multi million dollar organizations it is no longer acceptable to claim but I m not a numbers person and believe that it is someone else s job Data is everywhere Smart watches track our steps heart rate and blood oxygen levels social media platforms recommend people we might know and products we might like and map applications on our phones suggest when we should leave home taking into consideration where our next appointment is and what the traffic is like Dr Selena Fisk believes that the data informed can use the numbers in conjunction with an understanding of contexts people and different situations to lead change and make shifts in what they do This book steps through the why of data and the types of data we often see and use through three key areas data literacy data visualization and data storytelling
