Google Juice , **Cash Return on Capital Invested** Pascal Costantini,2011-02-24 In this book Pascal Costantini gives a lively and wonderfully readable account of ten years of efforts by a small group of investment analysts to find a reliable practical and implementable method for valuing and selecting shares The result of their effort is an original investment methodology called CROCI Cash Return on Capital Invested best described as a variation of the economic profit model For over a decade now Costantini's group at Deutsche Bank has been using this valuation tool every time it has had to take a view on the pricing of an equity asset be it a market a sector or an individual share in other words every single working day since it is this group's job to advise institutional investors on equity valuation Costantini describes in detail accompanied by concrete examples in the form of charts and graphs the precise investment results of the actual implementation of the CROCI approach in the global equity markets since 1996 Readers will enjoy taking this journey with Costantini to see how and why the model was developed assess the results of ten years of actual implementation and measure the successes of using this model in stock picking and portfolio construction This book will also make it easy for them to see how the CROCI approach can be used successfully by others now and in the future The book is divided into four parts The first part is a review and discussion of the fundamentals of investment analysis The second part is dedicated to the construction of economic data with the sole objective of calculating an economically meaningful asset multiple and relative return the combination of which gives an economic PE ratio the authors main stock selection tool While the economic profit model is not exactly new it is still largely ignored by the investment community In essence it does three things it calculates the real amount of cash or value created by a business it compares the market value of an asset to an approximation of its replacement value and it assumes that the former will converge to the latter through the arbitrage of investors and capital providers The third part is dedicated to the analysis of economic data and the last part deals with the actual implementation of the CROCI economic profit model including real life examples This final part also discusses how to use the output of the CROCI model with individual stocks and then with investment portfolios Techniques are based on the authors performance record at Deutsche Bank since 1996 Based on almost ten years of proprietary knowledge and implementation of these techniques Factual illustrations of the results of the valuation techniques are provided at each step Techniques are based on the author's performance record at Deutsche Bank since 1996 Based on almost ten years of proprietary knowledge and implementation of these techniques Factual illustrations of the results of the valuation techniques are provided at each step *Shoe Retailer and Boots and Shoes Weekly* ,1908 *Boot and Shoe Recorder* ,1897 *The Economist* ,1868 *Ski* ,1980 *The Post* ,1924 **Bradstreet's** ,1880 **Michigan Farmer and State Journal of Agriculture** ,1922 *Stores* ,1982 *Boot and Shoe Recorder* ,1958 *Bradstreet's Weekly* ,1891 **Hide and Leather with Shoe Factory** ,1920 **Legislative Documents, Comprising the Department and Other Reports, Made to the Senate and House of Representatives**
