Type Matters Christopher Scott Wyatt, Dànielle Nicole DeVoss, 2017-09-01 Pending **Type Matters!** Jim Williams, 2012 This text is a book of tips for everyday use for all users of typography from students and professionals to anyone who does any layout design on a computer The book is arranged into three chapters an introduction to the basics of typography headline and display type and setting text Type Matters Christopher Scott Wyatt, Dánielle Nicole DeVoss, 2017-10-11 Type Matters bridges the scholarship of typography and design with the field of rhetoric Contributors address the ways in which and places where typography enacts or reveals rhetorical principles Priority in Aristotle's Metaphysics Michail Peramatzis, 2011-08-11 Michail Peramatzis presents a new interpretation of Aristotle's view of the priority relations between fundamental and derivative parts of reality following the recent revival of interest in Aristotelian discussions of what priority consists in and how it relates existents He explores how in Aristotle's view in contradistinction with e.g. Quinean metaphysical views questions of existence are not considered central Rather the crucial questions are what types of existent are fundamental and what their grounding relation to derivative existents consists in It is extremely important therefore to return to Aristotle's own theses regarding priority and to study them not only with exegetical caution but also with an acutely critical philosophical eye Aristotle deploys the notion of priority in numerous levels of his thought In his ontology he operates with the notion of primary substance His Categories for instance confer this honorific title upon particular objects such as Socrates or Bucephalus while in the Metaphysics it is essences or substantial forms such as being human which are privileged with priority over certain types of matter or hylomorphic compounds either particular compound objects such as Socrates or universal compound types such as the species human Peramatzis chief aim is to understand priority claims of this sort in Aristotle's metaphysical system by setting out the different concepts of priority and seeing whether and if so how Aristotle's preferred prior and posterior items fit with these concepts *Insiders versus Outsiders* Andreas Dür, Gemma Mateo, 2016-07-08 What explains differences in the lobbying behaviour of interest groups And what consequences do these differences have for the access that interest groups can gain to decision makers and the influence that they can exert on policy outcomes Building on an unprecedented amount of empirical evidence on lobbying in Europe this book puts forward a distinction between lobbying insiders and lobbying outsiders Lobbying insiders most prominently business interests try to establish direct contacts with decision makers enjoy good access to executive institutions and manage to shape policy outcomes when mobilizing the public on an issue is difficult Lobbying outsiders in particular citizen groups such as consumer environmental or health non governmental organizations put greater emphasis on mobilizing the public or changing public attitudes find it easier to gain access to legislative decision makers and have the greatest impact on outcomes on issues that are amenable to an outside lobbying campaign The book shows that a single argument building on group type as the main variable can explain variation across interest groups in their choice of strategy their access to

decision makers and the conditions under which they can exert influence The existence of lobbying insiders and lobbying outsiders has important implications for both our understanding of political decision making and the normative appraisal of contemporary democracy *R.J. Rummel: An Assessment of His Many Contributions* Nils Petter Gleditsch,2017-05-30 This book is open access under a CC BY license The book provides a critical and constructive assessment of the many contributions to social science and politics made by Professor R J Rummel Rummel was a prolific writer and an important teacher and mentor to a number of people who in turn have made their mark on the profession His work has always been controversial But after the end of the Cold War his views on genocide and the democratic peace in particular have gained wide recognition in the profession He was also a pioneer in the use of statistical methods in international relations His work in not easily classified in the traditional categories of international relations research realism idealism and constructivism He was by no means a pacifist and his views on the US Soviet arms race led him to be classified as a hawk But his work on the democratic peace has become extremely influential among liberal IR scholars and peace researchers Above all he was a libertarian *The American Stationer* ,1884 **Nation's Traffic** ,1927 **Walsh V.
