Chapter 17 Section 4 The Home Front Answers:

Concentration Camps on the Home Front John Howard, 2009-05-15 Without trial and without due process the United States government locked up nearly all of those citizens and longtime residents who were of Japanese descent during World War II. Ten concentration camps were set up across the country to confine over 120,000 inmates. Almost 20,000 of them were shipped to the only two camps in the segregated South: Jerome and Rohwer in Arkansas, locations that put them right in the heart of a much older, long-festering system of racist oppression. The first history of these Arkansas camps, *Concentration Camps on the Home Front*, is an eye-opening account of the inmates' experiences and a searing examination of American imperialism and racist hysteria. While the basic facts of Japanese American incarceration are well known, John Howard's extensive research gives voice to those whose stories have been forgotten or ignored. He highlights the roles of women, first-generation immigrants, and those who forcefully resisted their incarceration by speaking out against dangerous working conditions and white racism. In addition to this overlooked history of dissent, Howard also exposes the government's aggressive campaign to Americanize the inmates and even convert them to Christianity. After the war ended, this movement culminated in the dispersal of the prisoners across the nation in a calculated effort to break up ethnic enclaves. Howard's recreation of life in the camps is powerful, provocative, and disturbing. *Concentration Camps on the Home Front* rewrites a notorious chapter in American history, a shameful story that nonetheless speaks to the strength of human resilience in the face of even the most grievous injustices.

On the Home Front Michele Stenehjem Gerber, 2007-07-01 *On the Home Front* is the only comprehensive history of the Hanford Nuclear Site, America's most productive and wasteful plutonium manufacturing facility. Located in southeastern Washington State, the Hanford Site produced the plutonium used in the atomic bombs that ended World War II. This book was made possible by the declassification in the 1980s of tens of thousands of government documents relating to the construction, operation, and maintenance of the site. The third edition contains a new introduction by John M. Findlay and a new epilogue by the author.

Labor's Home Front Andrew E. Kersten, 2009-03 One of the oldest, strongest, and largest labor organizations in the U.S., the American Federation of Labor (AFL) had 4 million members in over 20,000 union locals during World War II. The AFL played a key role in wartime production and was a major actor in the contentious relationship between state-organized labor and the working class in the 1940s. The war years are pivotal in the history of American labor, but books on the AFL's experiences are scant, with far more on the radical Congress of Industrial Organizations (CIO). Andrew E. Kersten closes this gap with *Labor's Home Front*, challenging us to reconsider the AFL and its influence on twentieth-century history. Kersten details the union's contributions to wartime labor relations, its opposition to the open shop movement, divided support for fair employment and equity for women and African American workers, its constant battles with the CIO, and its significant efforts to reshape American society, economics, and politics after the war. Throughout, Kersten

frames his narrative with an original central theme that despite its conservative nature the AFL was dramatically transformed during World War II becoming a more powerful progressive force that pushed for liberal change
