

CHAPTER 2: BASIC MANAGERIAL ACCOUNTING CONCEPTS

The Meaning and Uses of Cost

- **Cost** is the amount of cash or cash equivalent sacrificed for goods and/or services that bring a current or future benefit to the organization.
- As costs are used up in the production of revenues, they are said to expire. Expired costs are called **expenses**.

One of the most important tasks of managerial accounting is to determine the cost of products, services, customers, and other items of interest to managers. Therefore, we need to understand the meaning of cost and the ways in which costs can be used to make decisions, both for small entrepreneurial businesses and large international businesses. Cost is the amount of cash or cash equivalent sacrificed for goods and/or services that are expected to bring a current or future benefit to the organization.

Cost Objects

- Managerial accounting systems are structured to measure and assign costs.
- A **cost object** is any item such as a product, customer, department, project, geographic region or plant, for which costs are measured and assigned.

Managerial accounting systems are structured to measure and assign costs to entities called cost objects. A cost object is any item such as a product, customer, department, project, geographic region, plant, and so on, for which costs are measured and assigned

Measures of Output and the Relevant Range

- A **cost driver** is a causal factor that measures the output of the activity that leads (or causes) costs to change.
- Identifying and managing drivers helps managers better predict and control costs.

Examples: production, sales, number of hours

- **Cost Pool**- a grouping of individual cost items; an account in which a variety of similar costs are accumulated

Examples work in process, factory overhead control

- **Activity**- an event, action transaction, task, or unit of work with a specified purpose

Value-adding activities- activities that are necessary (non-eliminable) to produce the products
