Foundations, Models and Applications Dr. K. VANITHA SIDAMBARANATHAN, Dr. R. SRIVIDHYA, Dr. P. EDITH LINDA, Dr. LINCE RACHEL VARGHESE, 2025-10-15 *Generative AI Foundations: Models and Applications* provides a comprehensive exploration of one of the most transformative areas of artificial intelligence. Designed for students, researchers, educators, and professionals, this book offers a balanced blend of theory, models, and real-world use cases of generative AI. The text begins by introducing the fundamentals of generative modeling, covering the mathematical and conceptual underpinnings that make generative AI possible. It then progresses into a detailed study of prominent models, including Generative Adversarial Networks (GANs), Variational Autoencoders (VAEs), Diffusion Models, Large Language Models (LLMs), and Multimodal Systems. Beyond the foundations, the book emphasizes the practical applications of generative AI across industries, ranging from natural language processing, computer vision, and healthcare to education, creative arts, business innovation, and scientific research. Ethical considerations, challenges, and future trends are also discussed, equipping readers to critically analyze the opportunities and risks of this rapidly evolving field. With clear explanations, case studies, and an application-driven perspective, this book serves as both an academic resource and a practical guide for those seeking to understand and leverage generative AI in real-world contexts.

OpenAI Sora for Beginners Taylor Brooks, 2026-02-15 *OpenAI Sora for Beginners: Create and Monetize AI Videos from Text Prompts* is a practical step-by-step guide for anyone who wants to use OpenAI Sora to turn written ideas into structured AI-generated videos. This book is designed for beginners, content creators, affiliate marketers, YouTubers, and digital product builders who want cinematic-style visuals without cameras, actors, or traditional editing software. Many people are curious about text-to-video AI but quickly get stuck once they open the interface. They see multiple creative options, style variations, scene controls, and prompt fields without a clear starting sequence. Tutorials online often focus on features instead of process, skip essential steps, or assume prior experience in filmmaking. The result is confusion, inconsistent outputs, and wasted time experimenting without structure. This guide removes that friction by teaching a clear, repeatable workflow for AI video creation. You learn exactly how to move from concept to finished clip, including how to prepare a simple idea structure, a strong text prompt, define scene details, refine tone and visual style, and iterate logically without starting over. Each stage builds in sequence so you always know what to do next. Inside, you will follow practical builds that can be reused or adapted, including: Creating a short cinematic intro for a YouTube channel; Generating AI B-roll from a written script; Turning product notes into a simple promotional clip; Converting a blog post into a short visual sequence; Building short faceless content using text prompts. The book introduces simple frameworks to reduce decision fatigue, such as a Scene Blueprint method, a Prompt Expansion pattern, and a Refine and Review loop. These repeatable structures make AI filmmaking more manageable and consistent. Naturally integrated throughout the guide are beginner-friendly search topics such as: AI text-to-video tutorial; Sora AI video creation guide; create AI videos from text; cinematic AI video prompts; AI video monetisation guide; text-to-video workflow for beginners; AI video for YouTube creators.

generate video from script no camera video production AI filmmaking for beginners OpenAI Sora tutorial step by step digital content video automation AI B roll generation method create promotional videos with AI and simple AI video production system You will also learn how to Improve prompt clarity for stronger visuals Structure scenes for cinematic flow Control style tone and pacing Export usable clips for digital platforms Apply AI generated video in real content workflows Rather than abstract discussions about artificial intelligence this book focuses on practical execution Each example demonstrates a small recognizable build that shows how to move from written text to finished video output using a structured method No prior video production experience is required No complex editing software knowledge is assumed The emphasis remains on usability sequence and clarity so you can confidently create AI videos from text prompts and apply them in practical digital environments
