Advances in Robot Design and Intelligent Control Theodor Borangiu,2015-08-07 This volume includes the Proceedings of the 24th International Conference on Robotics in Alpe Adria Danube Region RAAD 2015 which was held in Bucharest Romania on May 27 29 2015 The Conference brought together academic and industry researchers in robotics from the 11 countries affiliated to the Alpe Adria Danube space Austria Croatia Czech Republic Germany Greece Hungary Italy Romania Serbia Slovakia and Slovenia and their worldwide partners According to its tradition RAAD 2015 covered all important areas of research development and innovation in robotics including new trends such as bio inspired and cognitive robots visual servoing of robot motion human robot interaction and personal robots for ambient assisted living The accepted papers have been grouped in nine sessions Robot integration in industrial applications Grasping analysis dexterous grippers and component design Advanced robot motion control Robot vision and sensory control Human robot interaction and collaboration Modelling and design of novel mechanisms and robotic structures Robots in medicine and rehabilitation Tracking systems and Unmanned Aerial Vehicles Autonomous task learning motion planning and scheduling

Robotic Vision Peter Corke,2021-10-15 This textbook offers a tutorial introduction to robotics and Computer Vision which is light and easy to absorb The practice of robotic vision involves the application of computational algorithms to data Over the fairly recent history of the fields of robotics and computer vision a very large body of algorithms has been developed However this body of knowledge is something of a barrier for anybody entering the field or even looking to see if they want to enter the field What is the right algorithm for a particular problem and importantly How can I try it out without spending days coding and debugging it from the original research papers The author has maintained two open source MATLAB Toolboxes for more than 10 years one for robotics and one for vision The key strength of the Toolboxes provide a set of tools that allow the user to work with real problems not trivial examples For the student the book makes the algorithms accessible the Toolbox code can be read to gain understanding and the examples illustrate how it can be used instant gratification in just a couple of lines of MATLAB code The code can also be the starting point for new work for researchers or students by writing programs based on Toolbox functions or modifying the Toolbox code itself The purpose of this book is to expand on the tutorial material provided with the toolboxes add many more examples and to weave this into a narrative that covers robotics and computer vision separately and together The author shows how complex problems can

be decomposed and solved using just a few simple lines of code and hopefully to inspire up and coming researchers The topics covered are guided by the real problems observed over many years as a practitioner of both robotics and computer vision It is written in a light but informative style it is easy to read and absorb and includes a lot of Matlab examples and figures The book is a real walk through the fundamentals light and color camera modelling image processing feature extraction and multi view geometry and bring it all together in a visual servo system An authoritative book reaching across fields thoughtfully conceived and brilliantly accomplished Oussama Khatib Stanford

Local Image Descriptor: Modern Approaches Bin Fan,Zhenhua Wang,Fuchao Wu,2016-01-04 This book covers a wide range of local image descriptors from the classical ones to the state of the art as well as the burgeoning research topics on this area The goal of this effort is to let readers know what are the most popular and useful methods in the current what are the advantages and the disadvantages of these methods which kind of methods is best suitable for their problems or applications and what is the future of this area What is more hands on exemplars supplied in this book will be of great interest to Computer Vision engineers and practitioners as well as those want to begin their research in this area Overall this book is suitable for graduates researchers and engineers in the related areas both as a learning text and as a reference book

Computer Vision and Graphics Leonard Bolc,Ryszard Tadeusiewicz,Leszek J. Chmielewski,Konrad Wojciechowski,2010-09-15 Annotation This book is part II of a two volume work that contains the refereed proceedings of the International Conference on Computer Vision and Graphics ICCVG 2010 held in Warsaw Poland in September 2010 The 95 revised full papers presented were carefully reviewed and selected from numerous submissions The papers are organized in three topical sections advances in pattern recognition machine vision and image understanding human motion analysis and synthesis and computer vision and graphics

Scale-Space Theories in Computer Vision Mads Nielsen,Peter Johansen,Ole F. Olsen,Joachim Weickert,1999-09-15 This volume constitutes the refereed proceedings of the Second International Conference on Scale Space Theories in Computer Vision Scale Space 99 held in Corfu Greece in September 1999 The 36 revised full papers and the 18 revised posters presented in the book were carefully reviewed and selected from 66 high quality submissions The book addresses all current aspects of this young and active field in particular geometric Image flows nonlinear diffusion functional minimization linear scale space etc

Computer Vision David Forsyth,Jean Ponce,2003 The accessible presentation of this book gives both a general view of the entire computer vision enterprise and also offers sufficient detail to be able to build useful applications Users learn techniques that have proven to be useful by first hand experience and a wide range of mathematical methods Comprehensive and up to date this book includes essential topics that either reflect practical significance or are of theoretical importance Topics are discussed in substantial and increasing depth Application surveys describe numerous important application areas such as image based rendering and digital libraries Many important algorithms broken down and illustrated in pseudo code Appropriate for use by engineers as a comprehensive reference to the computer vision enterprise
