The Internet needs no introduction and its significance today can hardly be exaggerated. Today more people are more connected technologically to one another than at any other time in human existence. For a large share of the world's people, the Internet, text messaging, and various other forms of digital social media such as Facebook have become thoroughly woven into the routines and rhythms of daily life. The Internet has transformed how we seek information, communicate, entertain ourselves, find partners, and increasingly it shapes our notions of identity and community. *The SAGE Encyclopedia of the Internet* addresses the many related topics pertaining to cyberspace, email, the World Wide Web, and social media. Entries will range from popular topics such as Alibaba and YouTube to important current controversies such as Net neutrality and cyberterrorism. The goal of the encyclopedia is to provide the most comprehensive collection of authoritative entries on the Internet available, written in a style accessible to academic and non-academic audiences alike. [Global Marketing Strategy](#) Bodo B. Schlegelmilch, 2022-02-16. It looks at the various global marketing challenges from a strategic perspective and also addresses topics not usually found in international marketing texts, such as aligning marketing strategies with global organizational structures and managing the relationship between national subsidiaries, regional headquarters, and global headquarters, as well as corporate social responsibility challenges and pertinent future trends that are likely to affect global business.
