Object Detection and Recognition in Digital Images Boguslaw Cyganek,2013-05-20 Object detection tracking and recognition in images are key problems in computer vision This book provides the reader with a balanced treatment between the theory and practice of selected methods in these areas to make the book accessible to a range of researchers engineers developers and postgraduate students working in computer vision and related fields Key features Explains the main theoretical ideas behind each method which are augmented with a rigorous mathematical derivation of the formulas their implementation in C and demonstrated working in real applications Places an emphasis on tensor and statistical based approaches within object detection and recognition Provides an overview of image clustering and classification methods which includes subspace and kernel based processing mean shift and Kalman filter neural networks and k means methods Contains numerous case study examples of mainly automotive applications Includes a companion website hosting full C implementation of topics presented in the book as a software library and an accompanying manual to the software platform

Morphological Image Analysis Pierre Soille,2013-03-14 Following the success of the first edition recent developments in the field of morphological image analysis called for an extended second edition The text has been fully revised with the goal of improving its clarity while introducing new concepts of interest to real image analysis applications One chapter devoted to texture analysis has been added Main extensions include discussion about multichannel images and their morphological processing ordering relations on image partitions connected operators and levellings homotopy for greytone images translation invariant implementations of erosions and dilations by line segments reinforced emphasis on rank based morphological operators grey tone hit or miss ordered independent homotopic thinnings and anchored skeletons self dual geodesic transformation and reconstruction area based self dual filters anti centre watershed based texture segmentation texture models and new scientific and industrial applications **Information Theory, Coding and Cryptography** Arijit Saha,NilotPal Manna,Surajit Mandal,2013 Information Theory Coding Cryptography has been designed as a comprehensive book for the students of engineering discussing Source Encoding Error Control Codes Cryptography The book contains the recent developments of coded modulation trellises for codes turbo coding for reliable data and interleaving The text balances the mathematical rigor with exhaustive amount of solved unsolved questions along with a database of MCQs Proceedings of Fourth International Conference on Computing and Communication Networks Akshi Kumar,Abhishek Swaroop,Pancham Shukla,2025-09-26 This book includes selected peer reviewed papers presented at fourth International Conference on Computing and Communication Networks ICCCN 2024 held at Manchester Metropolitan University UK during 17 18 October 2024 The book covers topics of network and computing technologies artificial intelligence and machine learning security and privacy communication systems cyber physical systems data analytics cyber security for industry 4 0 and smart and sustainable environmental systems Information Extraction and Object Tracking in Digital Video ,2022-08-17 The research

on computer vision systems has been increasing every day and has led to the design of multiple types of these systems with innumerous applications in our daily life The recent advances in artificial intelligence together with the huge amount of digital visual data now available have boosted vision system performance in several ways Information extraction and visual object tracking are essential tasks in the field of computer vision with a huge number of real world applications This book is a result of research done by several researchers and professionals who have highly contributed to the field of image processing It contains eight chapters divided into three sections Section 1 consists of four chapters focusing on the problem of visual tracking Section 2 includes three chapters focusing on information extraction from images Finally Section 3 includes one chapter that presents new advances in image sensors   Digital Image Processing, Global Edition Rafael C. Gonzalez,Richard E. Woods,2018-06-21 The full text downloaded to your computer With eBooks you can search for key concepts words and phrases make highlights and notes as you study share your notes with friends eBooks are downloaded to your computer and accessible either offline through the Bookshelf available as a free download available online and also via the iPad and Android apps Upon purchase you will receive via email the code and instructions on how to access this product Time limit The eBooks products do not have an expiry date You will continue to access your digital ebook products whilst you have your Bookshelf installed For courses in Image Processing and Computer Vision For years Image Processing has been the foundational text for the study of digital image processing The book is suited for students at the college senior and first year graduate level with prior background in mathematical analysis vectors matrices probability statistics linear systems and computer programming As in all earlier editions the focus of this edition of the book is on fundamentals The 4th Edition is based on an extensive survey of faculty students and independent readers in 5 institutions from 3 countries Their feedback led to expanded or new coverage of topics such as deep learning and deep neural networks including convolutional neural nets the scale invariant feature transform SIFT MERS graph cuts k means clustering and superpiels active contours snakes and level sets and each histogram matching Major improvements were made in reorganising the material on image transforms into a more cohesive presentation and in the discussion of spatial kernels and spatial filtering Major revisions and additions were made to examples and homework exercises throughout the book   AI Assurance Feras A. Batarseh,Laura Freeman,2022-10-12 AI Assurance Towards Trustworthy Explainable Safe and Ethical AI provides readers with solutions and a foundational understanding of the methods that can be applied to test AI systems and provide assurance Anyone developing software systems with intelligence building learning algorithms or deploying AI to a domain specific problem such as allocating cyber breaches analyzing causation at a smart farm reducing readmissions at a hospital ensuring soldiers safety in the battlefield or predicting exports of one country to another will benefit from the methods presented in this book As AI assurance is now a major piece in AI and engineering research this book will serve as a guide for researchers scientists and students in their studies and experimentation Moreover as AI is being increasingly discussed and utilized at government and

policymaking venues the assurance of AI systems as presented in this book is at the nexus of such debates Provides readers with an in depth understanding of how to develop and apply Artificial Intelligence in a valid explainable fair and ethical manner Includes various AI methods including Deep Learning Machine Learning Reinforcement Learning Computer Vision Agent Based Systems Natural Language Processing Text Mining Predictive Analytics Prescriptive Analytics Knowledge Based Systems and Evolutionary Algorithms Presents techniques for efficient and secure development of intelligent systems in a variety of domains such as healthcare cybersecurity government energy education and more Covers complete example datasets that are associated with the methods and algorithms developed in the book   Digital Image Processing and Analysis Scott E Umbaugh,2010-11-19 Whether for computer evaluation of otherworldly terrain or the latest high definition 3D blockbuster digital image processing involves the acquisition analysis and processing of visual information by computer and requires a unique skill set that has yet to be defined a single text Until now Taking an applications oriented engineering approach Digital Image Processing and Analysis provides the tools for developing and advancing computer and human vision applications and brings image processing and analysis together into a unified framework Providing information and background in a logical as needed fashion the author presents topics as they become necessary for understanding the practical imaging model under study He offers a conceptual presentation of the material for a solid understanding of complex topics and discusses the theory and foundations of digital image processing and the algorithm development needed to advance the field With liberal use of color through out and more materials on the processing of color images than the previous edition this book provides supplementary exercises a new chapter on applications and two major new tools that allow for batch processing the analysis of imaging algorithms and the overall research and development of imaging applications It includes two new software tools the Computer Vision and Image Processing Algorithm Test and Analysis Tool CVIP ATAT and the CVIP Feature Extraction and Pattern Classification Tool CVIP FEPC Divided into five major sections this book provides the concepts and models required to analyze digital images and develop computer vision and human consumption applications as well as all the necessary information to use the CVIPtools environment for algorithm development making it an ideal reference tool for this fast growing field   *Efficient deep neural network for intelligent robot system: Focusing on visual signal processing* Xiao Bai,Praveen Kumar Donta,Xin Ning,Weijun Li,2023-05-04
