Bridge Inspection Practices George Hearn, National Cooperative Highway Research Program, 2007 This synthesis reports bridge inspection practices in the United States and selected foreign countries. The synthesis is a collection of information on formal inspection practices of departments of transportation (DOTs). These are primarily visual inspections, and they provide data to bridge registries and databases. For U.S. inspection practices, this synthesis reports on inspection personnel, inspection types, and inspection quality control and quality assurance. Staff titles and functions in inspection programs are reported together with qualifications and training of personnel, formation of inspection teams, and assignment of teams to bridges. Inspection types are described in terms of their scope, methods, and intervals. Quality control and quality assurance programs are reviewed in terms of the procedures employed, staff involved, quality measurements obtained, and the use of quality findings in DOT inspection programs. Foreign practices are presented in the same organization of inspection personnel types and quality programs. Comparisons of U.S. and foreign inspection practices are included. Information was obtained from a questionnaire sent to U.S. state transportation departments, similar questionnaires modified individually for transportation agencies in selected foreign countries, and formal documents used by transportation departments and agencies. These documents primarily included bridge inspection manuals, inspection training manuals, and technical memoranda, but also included blank forms for inspections, DOTs job descriptions for inspectors, and descriptions of inspection

Aerospace Engineering, 1997 **The Channel Tunnel Experience**, 1997 **Maintenance Benchmarking and Best Practices** Ralph W. Peters, 2010-06-14 Over the past decade companies have redirected their maintenance operational focus from internal cost cutting to profit maximization This approach is referred to as profit centered maintenance Peters provides maintenance supervisors and managers with a benchmarking best practices road map called the Maintenance Operations Scoreboard The Scoreboard will allow maintenance managers to a determine and quantify benefits and savings b improve craft productivity and c define a strategy to improve efficiency and productivity These things are at the heart of a successful Profit Centered Maintenance organization The author devised Maintenance Operations Scoreboard is used to perform over 200 maintenance evaluations in over 5 000 profit centered maintenance organizations For example at Honda of America it was used extensively to direct maintenance strategy It was later translated into Japanese for presentation to key Japanese executives Another excellent example is Boeing Commercial Aircraft Inc

Boeing combined elements from this same Scoreboard with their company wide maintenance goals to develop The Boeing Scoreboard for Maintenance Excellence Over 60 facility maintenance work units at region group and team levels are evaluated at on site visits using the Scoreboard criteria **Interavia** ,1996 **Control Engineering** ,1994 Instrumentation and automatic control systems *Handbook of Maintenance Management and Engineering* Mohamed Ben-Daya,Salih O. Duffuaa,Abdul Raouf,Jezdimir Knezevic,Daoud Ait-Kadi,2009-07-30 To be able to compete successfully both at national and international levels production systems and equipment must perform at levels not even thinkable a decade ago Requirements for increased product quality reduced throughput time and enhanced operating effectiveness within a rapidly changing customer demand environment continue to demand a high maintenance performance In some cases maintenance is required to increase operational effectiveness and revenues and customer satisfaction while reducing capital operating and support costs This may be the largest challenge facing production enterprises these days For this maintenance strategy is required to be aligned with the production logistics and also to keep updated with the current best practices Maintenance has become a multidisciplinary activity and one may come across situations in which maintenance is the responsibility of people whose training is not engineering This handbook aims to assist at different levels of understanding whether the manager is an engineer a production manager an experienced maintenance practitioner or a beginner Topics selected to be included in this handbook cover a wide range of issues in the area of maintenance management and engineering to cater for all those interested in maintenance whether practitioners or researchers This handbook is divided into 6 parts and contains 26 chapters covering a wide range of topics related to maintenance management and engineering [Aerospace Engineering & Manufacturing](#) ,2008
