 India Bangladesh and Pakistan examines public administration issues and advances in the Indian subcontinent The book
 fulfills a critical need These nations have the largest public administration programs in South Asia yet existing knowledge on
 them is fragmented at best Bringing together leading scholars from these countries this book provides both an insider
 perspective and a scholarly look at the challenges and accomplishments in the region Focusing on the machinery of
 government the book explores questions such as What is the history of public administration development How are major
 decisions made in the agencies Why are anti corruption efforts so much a challenge What is the significance of
 intergovernmental relations What is the success of administrative reform What are examples of successful social
 development programs How successful is e government and what are its challenges Why is civil service reform difficult to
 achieve How is freedom of information being used as a means to combat corruption and invoke grassroots activism What can
 be learned from the successes and failures While public administration practice and education have become considerably
 professionalized in the last decade a sufficiently in depth and well rounded reference on public administration in these
 countries is sorely lacking Most available books tackle only aspects of public administration such as administrative reforms
 civil service economic developments or public policy and are country specific None provide the in depth analysis of the
 sphere of public action in South Asia found in this book It supplies an understanding of how public administration can be
