Kiely,1999-12-01 Electron Microscopy and Analysis 1999 provides an overview of recent developments and outlines opportunities for future research in electron microscopy The book presents the wide ranging applications of these techniques in materials science metallurgy and surface science It is an authoritative reference for academics and researchers working in materials science instrumentation electron optics and condensed matter physics

Electron Backscatter Diffraction in Materials Science Adam J. Schwartz,Mukul Kumar,Brent L. Adams,David P. Field,2013-06-29 Crystallographic texture or preferred orientation has long been known to strongly influence material properties Historically the means of obtaining such texture data has been through the use of x ray or neutron diffraction for bulk texture measurements or transmission electron microscopy or electron channeling for local crystallographic information In recent years we have seen the emergence of a new characterization technique for probing the microtexture of materials This advance has come about primarily through the automated indexing of electron backscatter diffraction EBSD patterns The first commercially available system was introduced in 1994 and since then of sales worldwide has been dramatic This has accompanied widening the growth applicability in materials science problems such as microtexture phase identification grain boundary character distribution deformation microstructures etc and is evidence that this technique can in some cases replace more time consuming transmission electron microscope TEM or x ray diffraction investigations The benefits lie in the fact that the spatial resolution on new field emission scanning electron microscopes

SEM can approach 50 nm but spatial extent can be as large a centimeter or greater with a computer controlled stage and montagingofthe images Additional benefits include the relative ease and low costofattaching EBSD hardware to new or existing SEMs Electron backscatter diffraction is also known as backscatter Kikuchi diffraction BKD or electron backscatter pattern technique EBSP Commercial names for the automation include Orientation Imaging Microscopy OIMTM and Automated Crystal Orientation Mapping ACOM
