

62. a) If the departments share the equipment, then the maximum number of each type is all that is required, so we want to take the union of the multibets, $A \cup B$.
 b) Both departments will use the minimum number of each type, so we want to take the intersection of the multibets, $A \cap B$.
 c) This will be the difference $B - A$ of the multibets.
 d) If no sharing is allowed, then the university needs to purchase a quantity of each type of equipment that is the sum of the quantities used by the departments, this is the sum of the multibets, $A + B$.
64. Taking the maximum for each person, we have $N(1, T) = \{0.6 \text{ Allen}, 0.9 \text{ Brian}, 0.4 \text{ Fred}, 0.8 \text{ George}, 0.7 \text{ Hilary}\}$.

SECTION 2.3 Functions

1. a) This is not a function because the rule is not well-defined. We do not know whether $f(3) = 3$ or $f(3) = -3$. For a function, it cannot be both at the same time.
 b) This is a function. For all integers n , $\sqrt{n^2 + 1}$ is a well-defined real number.
 c) This is not a function with domain \mathbb{Z} , since for $n = 2$ (and also for $n = -2$) the value of $f(n)$ is not defined by the given rule. In other words, $f(2)$ and $f(-2)$ are not specified since division by 0 makes no sense.
4. a) The domain is the set of nonnegative integers, and the range is the set of digits (0 through 9).
 b) The domain is the set of positive integers, and the range is the set of integers greater than 1.
 c) The domain is the set of all bit strings, and the range is the set of nonnegative integers.
 d) The domain is the set of all bit strings, and the range is the set of nonnegative integers (a bit string can have length 0).
6. a) The domain is $\mathbb{Z}^n \times \mathbb{Z}^n$ and the range is \mathbb{Z}^n .
 b) Since the largest decimal digit of a strictly positive integer cannot be 0, we have domain \mathbb{Z}^n and range $\{1, 2, 3, 4, 5, 6, 7, 8, 9\}$.
 c) The domain is the set of all bit strings. The number of 1's minus number of 0's can be any positive or negative integer or 0, so the range is \mathbb{Z} .
 d) The domain is given as \mathbb{Z}^n . Clearly the range is \mathbb{Z}^n as well.
 e) The domain is the set of bit strings. The range is the set of strings of 1's, i.e., $\{\lambda, 1, 11, 111, \dots\}$, where λ is the empty string (containing no symbols).
8. We simply round up or down to each case.
 a) 1 b) 2 c) -1 d) 0 e) 3 f) -2 g) $\lfloor \frac{1}{2} + 1 \rfloor = \lfloor \frac{3}{2} \rfloor = 1$
 h) $\lfloor 0 + 1 + \frac{1}{2} \rfloor = \lfloor \frac{3}{2} \rfloor = 1$
10. a) This is one-to-one. b) This is not one-to-one, since 6 is the image of both a and b .
 c) This is not one-to-one, since d is the image of both a and b .
12. a) This is one-to-one, since if $m_1 - 1 = m_2 - 1$, then $m_1 = m_2$.
 b) This is not one-to-one, since, for example, $f(3) = f(-2) = 10$.
 c) This is one-to-one, since if $m_1^2 = m_2^2$, then $m_1 = m_2$ (take the cube root of each side).
 d) This is not one-to-one, since, for example, $f(2) = f(4) = 2$.

Discrete Maths and Its Applications Global Edition 7e Kenneth Rosen,2012-09-16 We are pleased to present this Global Edition which has been developed specifically to meet the needs of international students of discrete mathematics In addition to great depth in key areas and a broad range of real world applications across multiple disciplines we have added new material to make the content more relevant and improve learning outcomes for the international student This Global Edition includes An entire new chapter on Algebraic Structures and Coding Theory New and expanded sections within chapters covering Foundations Basic Structures and Advanced Counting Techniques Special online only chapters on Boolean Algebra and Modeling Computation New and revised problems for the international student integrating alternative methods and solutions This Global Edition has been adapted to meet the needs of courses outside of the United States and does not align with the instructor and student resources available with the US edition [Comprehensive Guide to VITEEE with 3 Online Tests 7th Edition](#) Disha Experts,2021-12-27 The book Comprehensive Guide to VITEEE Online Test with 3 Online Tests 7th Edition covers the 100% syllabus in Physics Chemistry and Mathematics as per latest exam pattern The book also provides the solved papers of 2017 to 2019 The book also introduces the English Grammar Comprehension Pronunciation portion as introduced in the syllabus in the last year The book is further empowered with 3 Online Tests Each chapter contains Key Concepts Solved Examples Exercises in 2 levels with solutions [New Trends in Intelligent Software Methodologies, Tools and Techniques](#) Ali Selamat,Sigeru Omatu,2017-09-15 Software is an essential enabler for science and the new economy It creates new markets and directions for a more reliable flexible and robust society and empowers the exploration of our world in ever more depth but it often falls short of our expectations Current software methodologies tools and techniques are still neither robust nor reliable enough for the constantly evolving market and many promising approaches have so far failed to deliver the solutions required This book presents the keynote Engineering Cyber Physical Systems and 64 peer reviewed papers from the 16th International Conference on New Trends in Intelligent Software Methodology Tools and Techniques SoMeT_17 held in Kitakyushu Japan in September 2017 which brought together researchers and practitioners to share original research results and practical development experience in software science and related new technologies The aim of the SoMeT conferences is to capture the essence of the new state of the art in software science and its supporting technology and to identify the challenges such technology will have to master The book explores new trends and theories which illuminate the direction of developments in this field and will be of interest to anyone whose work involves software science and its integration into tomorrow s global information society [Passive Network Synthesis: An Approach to Classification](#) Alessandro Morelli,Malcolm C. Smith,2019-05-21 A resurgence of interest in network synthesis in the last decade motivated in part by the introduction of the inerter has led to the need for a better understanding of the most economical way to realize a given passive impedance This monograph outlines the main

contributions to the field of passive network synthesis and presents new research into the enumerative approach and the classification of networks of restricted complexity *Passive Network Synthesis An Approach to Classification* serves as both an ideal introduction to the topic and a definitive treatment of the Ladenheim catalogue In particular the authors provide a new analysis and classification of the Ladenheim catalogue building on recent work to obtain an improved understanding of the structure and realization power of the class within the biquadratic positive real functions This book is intended for researchers in systems and control real algebraic geometry electrical and mechanical networks and dynamics and vibration

Shevchenko, 1996-10-15 Integer solutions for systems of linear inequalities equations and congruences are considered along with the construction and theoretical analysis of integer programming algorithms The complexity of algorithms is analyzed dependent upon two parameters the dimension and the maximal modulus of the coefficients describing the conditions of the problem The analysis is based on a thorough treatment of the qualitative and quantitative aspects of integer programming in particular on bounds obtained by the author for the number of extreme points This permits progress in many cases in which the traditional approach which regards complexity as a function only of the length of the input leads to a negative result **Subject Guide to Books in Print**, 2001 Student's Solutions Guide Jerrold W.
