Childcare in Public Preschools Renita Thedvall, 2019-01-14 *Fast Childcare in Public Preschools* presents an ethnographic examination of the implementation of fast policy management models and the efforts of teachers to use these to improve their work organization and the frictions this brings. Using examples from Swedish public preschools, the book focuses on essential areas of the Lean management model, in particular bringing to life concepts relating to the care and education of children. The book draws on international childcare policy and public reforms, exploring the assignments that preschools are set and argues that separating the pedagogical and the organizational, as suggested by proponents of management models, is not possible. This book considers Jamie Peck and Nik Theodore's work on fast policy and model power and analyzes the tensions between the easy to use and difficult to use in management models. The model form of Lean's management model rendered it difficult to align with existing childcare policy, pedagogical models, and the organization of a preschool. The book explores the utopian dimension of a modern project in pursuit of efficiency and speed in relation to the Lean model and the preschool teachers' work by asking what are the wider societal implications of the Lean project in preschools. *Fast Childcare in Public Preschools* will be of great interest to cultural anthropologists, qualitative sociologists, and political scientists and organizational researchers interested in the anthropology of policy.

[Understanding, Measuring, and Improving 5S for Operations to Support TPM](#) Ross Kenneth Kennedy, 2025-12-24 Many sites introduce 5S and Total Productive Maintenance (TPM) into their production areas but they are disappointed as improvements are not sustained, especially if more than one shift is involved. To address this issue, this book presents an approach to 5S thinking that assists sites to establish Production Area Based Teams of four to eight members, including a designated Production Frontline Leader with effective responsibility for their workplace. Then, through an inductive approach of emotive questioning, all Production Area Based Team members are engaged to embrace 5S thinking through an improvement activity called Work Area Management, an enhanced version of 5S and a prerequisite for successful implementation of TPM's Autonomous Maintenance. This approach uses a ten-step process and initially focuses on the Work Area to minimize extra work thrown to the Maintenance Department. It involves allocating Focus Points to each team member other than the Production Frontline Leader to ensure involvement and accountability, introducing Compliance Audits for agreed standards to reinforce correct behaviours, and Improvement Sheets to ensure agreement between shifts before implementing any changes. This results in a sustained neat work area with a place for everything and everything in its place, but more importantly, a work area where standards are agreed upon and respected across all shifts. This approach also provides a very solid foundation for going forward with TPM's Autonomous Maintenance, which includes 5S thinking for the equipment to achieve a failure-free, zero breakdowns, trouble-free, zero quality problems, and safe workplace, zero accidents and incidents.

[Making Work Visible](#) Dominica DeGrandis, 2022-03-15 Today's workers are drowning in nonstop requests for time, days filled to the brim with meetings and endless nights spent heroically fixing the latest problems.
