Novel Therapeutics from Modern Biotechnology Dale L. Oxender, Leonard E. Post, 2013-06-29 A cover story of Business Week Magazine in January 1984 stated Biotech Comes of Age In February 1986 Venture Magazine had a cover article entitled The Biotech Revolution is Here This article went on to say New Genetic Technologies Will Transform Our Lives These announcements were made many years after the first biotechnology companies such as Genentech Cetus Amgen and Biogen were formed to commercialize the New Biology At the time of writing this book

there are over 1300 biotech companies developing new technologies or identifying potential biotech drugs Most of these companies were started in the height of the high technology hype although companies are still forming as the technology advances A more recent survey showed only a relatively small number of Food and Drug Administration FDA approvals among over several hundred biotech nology products now in clinical trial One could ask why it has taken so long to produce biotechnology products Part of the reason is that each new class of biotech products brings with it a set of problems that need to be solved before they enter clinical trials These problems are often unique to biotechnology products such as peptides proteins monoclonal antibodies nucleic acids and cellular therapies

**Macrophages** Vijay Kumar,2022-12-14 Macrophages were first discovered in 1882 when Elia Metchnikoff recognized them as important phagocytic cells that can engulf any foreign material including fungal spores This discovery has proved to be a milestone in establishing the field of innate immunity Macrophages are still ruling the area after 140 years of their discovery This book explores the diverse role of macrophages in vertebrate immunity parasitic bacterial and viral infections regeneration inflammation and neurological diseases
