Young Men in Israeli Haredi Yeshiva Education Yohai Hakak, 2012-09-28 By looking at the case of Lithuanian yeshivas in Israel Yohai Hakak's book explores the internal tensions and dynamics of religious orders during a stage of a relative loss of charisma in which the enthusiasm of the founding generation has diminished It is the first study to include participant observations conducted within these institutions which are the sacred heart of this segregated and highly religious community The book highlights the current crisis these fundamentalist institutions are going through marked by a dramatic growth in yeshiva dropout rates It examines the new and innovative ways the rabbis are trying to respond to the crisis As part of these attempts the rabbinical discourse portrays a unique utopian and egalitarian world governed by supernatural forces and unlimited spiritual resources and incorporates Western psychological and democratic ideas Hakak's book is a great scholarly achievement Motti Inbari University of North Carolina at Pembroke In sum the book manages to elaborate on important developments and changes in the Haredi world The emergence of cautious deviance questioning of old ideals or the rise of individuality At the same time Hakak explains how these changes inflict strains upon the social structure of the Haredi world The book can be therefore recommended particularly to scholars dealing with the development within the Haredi society Peter Lintl Institut für Politische Wissenschaft Friedrich Alexander Universität Erlangen Nürnberg

Material Noise Anne M. Royston, 2019-09-17 An argument that theoretical works can signify through their materiality their noise or such nonsemantic elements as typography as well as their semantic content In *Material Noise* Anne Royston argues that theoretical works signify through their materiality such nonsemantic elements as typography or color as well as their semantic content Examining works by Jacques Derrida Avital Ronell Georges Bataille and other well known theorists Royston considers their materiality and design which she terms noise as integral to their meaning In other words she reads these theoretical works as complex assemblages just as she would read an artist's book in all its idiosyncratic tangibility Royston explores the formlessness and heterogeneity of the Encyclopedia Da Costa which published works by Bataille Andr Breton and others the use of layout and white space in Derrida's *Glas* the typographic illegibility static and interference in Ronell's *The Telephone Book* and the enticing surfaces of Mark C Taylor's *Hiding its digital counterpart* The Real Las Vegas NV and Shelley Jackson's *Skin* Royston then extends her analysis to other genres examining two recent artists books that express explicit theoretical concerns Johanna Drucker's *Stochastic Poetics* and Susan Howe's *Tom Tit Tot Throughout* Royston develops the concept of artistic arguments which employ signification that exceeds the semantics of a printed text and are not reducible to a series of linear logical propositions Artistic arguments foreground their materiality and reflect on the media that create them Moreover Royston argues each artistic argument anticipates some aspect of digital thinking speaking directly to such contemporary concerns as hypertext communication
