Prototyping of User Interfaces for Mobile Applications Benjamin Bähr, 2017-03-14 This book investigates processes for the prototyping of user interfaces for mobile apps and describes the development of new concepts and tools that can improve the prototype-driven app development in the early stages. It presents the development and evaluation of a new requirements catalogue for prototyping mobile app tools that identifies the most important criteria such tools should meet at different prototype development stages. This catalogue is not just a good point of orientation for designing new prototyping approaches but also provides a set of metrics for comparing the performance of alternative prototyping tools. In addition, the book discusses the development of Blended Prototyping, a new approach for prototyping user interfaces for mobile applications in the early and middle development stages and presents the results of an evaluation of its performance showing that it provides a tool for teamwork-oriented creative prototyping of mobile apps in the early design stages.
