Gathering Social Network Data jimi adams,2019-06-03 Gathering Social Network Data provides an important complement to existing books that focus on social network analysis and offers more detailed coverage than is available in existing chapter length treatments In a single centralized source author jimi adams provides 1 a broad overview of the unique set of general principles underlying network data collection and 2 guidance on many particular details needed for the application of these principles to particular research questions As well as chapters on data collection methods the book includes a chapter on data quality and another on ethical considerations

Interactions between emotions and social context - Basic, clinical and non-human evidence Maria Ruz,Agustin Ibanez,Sonja A E Kotz,Louise Barrett,Jorge Moll,2014-07-17 The emotions that we feel and also those that we perceive in others are crucial to the social functioning of both humans and non human animals Although the role of context has been extensively studied in basic sensory processing its relevance for social cognition and emotional processing is little understood In recent years several lines of research at the behavioral and neural levels have highlighted the bidirectional interactions that take place between emotions and social context Experienced emotions even when incidental bias decision making Remarkably even basic emotions can be strongly influenced by situational contexts In addition both humans and non human animals can use emotional expressions strategically as a means of influencing and managing the behavioral response of others in relation to specific environmental situations Moreover social emotions e.g engaged in moral judgment empathic concern and social norms seem to be context dependent which also questions a purely abstract account of emotion understanding and expression as well as other social cognition domains The present Research Topic of Frontiers in Human Neuroscience highlights the need for a situated approach to emotion and social cognition We presented theoretical and empirical work at the behavioral and neural levels that contribute to our understanding of emotion within a highly contextualized social realm and vice versa Relevant contributions are presented from diverse fields including ethology neurology biology cognitive and social neuroscience and as well as psychology and neuropsychiatry This integrated approach that entails the interaction between emotion and social context provide important new insights into the growing field of social neuroscience
