Natural Language Understanding 2nd Edition

Richard Bailey

Natural Language Understanding 2nd Edition:

Natural Language Understanding James Allen, 1995 This long awaited revision offers a comprehensive introduction to natural language understanding with developments and research in the field today Building on the effective framework of the first edition the new edition gives the same balanced coverage of syntax semantics and discourse and offers a uniform framework based on feature based context free grammars and chart parsers used for syntactic and semantic processing Thorough treatment of issues in discourse and context dependent interpretation is also provided In addition this title offers coverage of two entirely new subject areas First the text features a new chapter on statistically based methods using large corpora Second it includes an appendix on speech recognition and spoken language understanding Also the information on semantics that was covered in the first edition has been largely expanded in this edition to include an emphasis on compositional interpretation 0805303340B04062001

Natural Language Processing Raymond Lee, 2025-04-16 This textbook provides a contemporary and comprehensive overview of Natural Language Processing NLP covering fundamental concepts core algorithms and key applications such as AI chatbots Large Language Models and Generative AI Additionally it includes seven step by step NLP workshops totaling 14 hours that offer hands on practice with essential Python tools including NLTK spaCy TensorFlow Keras Transformers and BERT The objective of this book is to provide readers with a fundamental grasp of NLP and its core technologies and to enable them to build their own NLP applications e.g Chatbot systems using Python based NLP tools It is both a textbook and NLP tool book intended for the following readers undergraduate students from various disciplines who want to learn NLP lecturers and tutors who want to teach courses or tutorials for undergraduate graduate students on NLP and related AI topics and readers with various backgrounds who want to learn NLP and more importantly to build workable NLP applications after completing its 14 hours of Python based workshops

Natural Language Processing in Action, Second Edition Hobson Lane, Maria Dyschel, 2025-02-25 Develop your NLP skills from scratch with an open source toolbox of Python packages Transformers Hugging Face vector databases and your own Large Language Models Natural Language Processing in Action Second Edition has helped thousands of data scientists build machines that understand human language In this new and revised edition you ll discover state of the art Natural Language Processing NLP models like BERT and HuggingFace transformers popular open source frameworks for chatbots and more You ll create NLP tools that can detect fake news filter spam deliver exceptional search results and even build truthfulness and reasoning into Large Language Models LLMs In Natural Language Processing in Action Second Edition you will learn how to Process analyze understand and generate natural language text Build production quality NLP pipelines with spaCy Build neural networks for NLP using Pytorch BERT and GPT transformers for English composition writing code and even organizing your thoughts Create chatbots and other conversational AI agents In this new and revised edition you ll discover state of the art NLP models like BERT and HuggingFace transformers popular open source

frameworks for chatbots and more Plus you ll discover vital skills and techniques for optimizing LLMs including conversational design and automating the trial and error of LLM interactions for effective and accurate results About the technology From nearly human chatbots to ultra personalized business reports to AI generated email news stories and novels natural language processing NLP has never been more powerful Groundbreaking advances in deep learning have made high quality open source models and powerful NLP tools like spaCy and PyTorch widely available and ready for production applications This book is your entrance ticket and backstage pass into the next generation of natural language processing About the book Natural Language Processing in Action Second Edition introduces the foundational technologies and state of the art tools you ll need to write and publish NLP applications You learn how to create custom models for search translation writing assistants and more without relying on big commercial foundation models This fully updated second edition includes coverage of BERT Hugging Face transformers fine tuning large language models and more What s inside NLP pipelines with spaCy Neural networks with PyTorch BERT and GPT transformers Conversational design for chatbots About the reader For intermediate Python programmers familiar with deep learning basics About the author Hobson Lane is a data scientist and machine learning engineer with over twenty years of experience building autonomous systems and NLP pipelines Maria Dyshel is a social entrepreneur and artificial intelligence expert and the CEO and cofounder of Tangible AI Cole Howard and Hannes Max Hapke were co authors of the first edition
