I was a Teenage Science Project Patricia G. Reed, 2001-10-10

Come down to the basement, Kazmierski said to me in a way that brooked no argument. She turned on the light at the top of the stairs. Sure, I told her. But what's down there? Don't worry, she answered. You won't remember a thing. Ninth grader Irene Mummalo enters high school with all the faith and confidence in the world, only to run up against kooky, devious, sadistic, and downright dangerous girl turned mad scientist Ethel Kazmierski, who makes friends her own way and let there be no two ways about it. How Irene, as well as her circle of friends that include Hannibal and Cannibal Mimsy and Lorrie Jean, manage to overcome the evil powers of Kazmierski, her magician parents, Frankensteinian dog, and spontaneously combustible brother who's trapped inside Irene's clock radio, forms the basis for *I WAS A TEENAGE SCIENCE PROJECT*, a novel of 17 chapters for middle grade readers.

Christian Science War Time Activities Scientist War Relief Committee, First Church of Christ, 2020-12-08

In *Christian Science War Time Activities*, the Scientist War Relief Committee of the First Church of Christ presents a comprehensive account of the church's humanitarian efforts during times of conflict. The book intricately weaves together testimonies, reports, and theoretical frameworks that illustrate the fusion of spiritual practice and social responsibility inherent to Christian Science. It employs a clear, accessible prose style and emphasizes practical applications of faith, aiming to mobilize readers towards compassionate action in response to global crises. Positioned against the sociopolitical backdrop of early 20th-century conflicts, the text critically evaluates the role of faith in wartime relief efforts and its implications for contemporary social engagement. The Scientist War Relief Committee, formed out of a profound commitment to embody the teachings of Mary Baker Eddy, the founder of Christian Science, has a rich history of involvement in charitable activities. Their initiative in publishing this work reflects an urgent response to the moral complexities of war, where spiritual healing is framed not only as a personal pursuit but as a collective duty to alleviate suffering. The committee's background in both religious doctrine and active service in humanitarian contexts has undoubtedly shaped the perspectives shared within the book. *Christian Science War Time Activities* is a vital read for anyone interested in the intersections of faith, ethics, and social action. Its insights into the role of spiritual communities in addressing humanitarian crises offer profound reflections for contemporary audiences. Engaging deeply with the principles of Christian Science, this work encourages readers to consider how they might contribute to healing and relief efforts in their own communities, making it both a poignant historical document and a call to action.
