American Universities in a Global Market Charles T. Clotfelter, 2010-04-28 In higher education the United States is the preeminent global leader dominating the list of the world's top research universities. But there are signs that America's position of global leadership will face challenges in the future as it has in other realms of international competition. American Universities in a Global Market addresses the variety of issues crucial to understanding this preeminence and this challenge. The book examines the various factors that contributed to America's success in higher education including openness to people and ideas, generous governmental support, and a tradition of decentralized, friendly competition. It also explores the advantages of holding a dominant position in this marketplace and examines the current state of American higher education in a comparative context, placing particular emphasis on how market forces affect universities. By discussing the differences in quality among students and institutions around the world, this volume sheds light on the singular aspects of American higher education.

The shift toward automation is about to create a tsunami of

unemployment Not in the distant future now One recent estimate predicts 45 million American workers will lose their jobs within the next twelve years jobs that won t be replaced In a future marked by restlessness and chronic unemployment what will happen to American society In *The War on Normal People* Andrew Yang paints a dire portrait of the American economy Rapidly advancing technologies like artificial intelligence robotics and automation software are making millions of Americans livelihoods irrelevant The consequences of these trends are already being felt across our communities in the form of political unrest drug use and other social ills The future looks dire but is it unavoidable In *The War on Normal People* Yang imagines a different future one in which having a job is distinct from the capacity to prosper and seek fulfillment At this vision s core is Universal Basic Income the concept of providing all citizens with a guaranteed income and one that is rapidly gaining popularity among forward thinking politicians and economists Yang proposes that UBI is an essential step toward a new more durable kind of economy one he calls human capitalism
