*Production Systems for Architects and Designers* Fred A. Stitt,1994-01 How many ways are there to save time and money in working drawings Let s count the ways ways readily available to architects engineers interior designers drafters CADD operators and project managers

- 1 Simplification There s a fast way and a slow way to do every aspect of working drawings from notation to dimensioning from finish schedules to specifications The streamlined ways described in this book can save up to 15% of commonly wasted production time with virtually no investment of time or money
- 2 Planning and Supervision Nobody learns how to supervise design and production employees in school nor have most supervisors had any business training This book names all the worst management and supervisor problems and the best practices to guarantee good employee morale along with high productivity
- 3 Quality Control Many if not most sets of working drawings go to bid without adequate final checking This expediency is paid for in cascades of change orders extras claims lawsuits and a national epidemic of building failures This book shows how to block the relatively few lapses that account for most failures
- 4 Design and Presentation Drawings A few simple changes in the way you do your design drawings can save 20% of working drawing time Fast track design drawing methods put you ahead of the game the day you start working on any job
- 5 Layering Screening Overlays Most offices don t understand the principle of logical and efficient layering of drawings As a result plotting a job takes twice as long as it should With this book your final job prints are twice as sharp and readable
- 6 Standard Details Standard construction details are the easiest efficiency tool any office can implement You can get up to 80% of time savings on detail drawings and quality control goes way up too
- 7 Photodrafting These days it s almost criminal not to use photodrafting to show existing conditions complex details and specified proprietary products Do it in house cheaply with or without CADD
- Keynoting Keynoting is catching on and has the formal approval of the AIA but it s not always used intelligently and can cause problems in bidding and construction This book tells the simplest most effective ways to make it work for you as well as your contractors
- 9 Photocopier Drafting Small jobs can be rushed to bid two to three times faster by using combinations of paste up techniques on the office copier One person firms can produce the work of three to six person offices with these magical techniques
- 10 CADD Offices that apply old drafting habits to CADD never achieve time or money savings with their computers and are lucky to match the productivity of manual drafting That will change when you adapt all

the fast track working drawing techniques described in this book 11 Database and Checklist Management Virtually everything a design office does is repeat work of one sort or another When you save potentially reusable work so that it can be conveniently retrieved revised and reapplied to later tasks it can become the central prize asset of the office This book shows you how easy it is to create a database of standard details standard notation and standard operating procedures in the form of convenient operating checklists The author of this book Fred Stitt is the nation s leading pioneer in A E database management BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Leading the Team** Dale Sinclair,2011 First Published in 2011 Routledge is an imprint of Taylor Francis an informa company
