the data received For this study the author focuses on AI s impact on WFM within the banking and finance industry The purpose of the following questions is to refine the present knowledge gap within the banking and finance industry regarding the WFM impact of AI The author will emphasize via a literature review and interviews exactly how AI based technology tools have been implemented in the banking and finance industry To do so three research questions have been chosen and will be further analyzed throughout this study paper The first question focuses on WFM and HR teams It predicts how many people and what kind of qualifications will be deployed As well as where and when they will be deployed There are many consequences of banks and other financial institutions implementing more AI technology In his book Competing in the Age of AI Iansiti and Lakhani mention that it is critical for leaders to understand the choice of model along with navigating the ethics of digital scale The author emphasizes that leaders must be able to build a strong organization of safety security and sustainability Firms spend billions of dollars on new AI related technologies and innovations Despite this banks and other financial institutions face three main issues The first challenge is an outdated operating model The second challenge is the lack of a fitting talent strategy Both challenges are interconnected to each other Likewise as a third challenge Workforce Management WFM the core process that boosts performance levels and competency for an organization has been reformed and disrupted by the introduction of AI   **The Artificial Intelligence Report** ,1984   Manufacturing Technology Review ,1986   **Writing with AI in EFL Classrooms: Students' Perspectives and Pedagogical Implications** Melanie Razonable,2026-03-18 Essay from the year 2026 in the subject Didactics for the subject English Miscellaneous grade 11 language English abstract The rapid development of Artificial Intelligence AI has begun to reshape educational practices across disciplines including language learning In English as a Foreign Language EFL contexts AI assisted writing tools are increasingly used to support learners during different stages of the writing process These tools provide functions such as idea generation vocabulary suggestions grammar feedback and text modeling which may help students overcome common difficulties in second language writing This paper explores students perspectives on the use of AI assisted writing tools in EFL classrooms and discusses the pedagogical implications of integrating these technologies into writing instruction Drawing on existing literature and theoretical frameworks such as the Technology Acceptance Model and the Presage Process Product model the discussion examines how students perceive the usefulness and accessibility of AI tools and how these perceptions influence their engagement with writing tasks The analysis suggests that EFL learners generally express positive attitudes toward AI writing tools reporting benefits such as reduced writing anxiety improved idea development and increased exposure to vocabulary and grammatical structures However the paper also highlights potential concerns including overreliance on AI inaccuracies in AI generated language and possible limitations for creativity and critical thinking when AI is used without guidance The paper argues that the effectiveness of AI in writing instruction depends not primarily on the technology itself but on how it is integrated into pedagogical practice Thoughtful instructional design and active teacher

guidance are essential to ensure that AI functions as a supportive learning tool rather than a substitute for meaningful language learning The study concludes by emphasizing the importance of responsible and reflective integration of AI technologies to support sustainable development in EFL writing education   *The American Monthly Review of Reviews* ,1900   **Computer Book Review** ,1986   **Annual Review of Information Science and Technology** Carlos A.
