ChatGPT eBook GURMEET SINGH DANG, **Building an Intelligent Enterprise with SAP Business AI** Avijit Dhar, 2026-02-13 Generative AI Gen AI represents a transformational technological shift by enabling the rapid creation of text images audio and video through learning from vast amounts of human generated data Unlike traditional programming that relies on explicit instructions Gen AI leverages machine learning to recognize patterns and generate content autonomously SAP has embraced this revolution with its SAP BTP Generative AI Hub a comprehensive platform designed to safely integrate generative AI and large language models into enterprise applications with seamless support across its product suite including S 4 HANA CRM and HXM This book provides a complete roadmap for understanding and applying these groundbreaking technologies It begins by exploring the origins and core concepts of AI deep learning and transformer architectures before delving into SAP s AI Core and Generative AI Hub offerings Through detailed step by step examples readers will learn to build enterprise use cases and discover the potential of Agentic AI for addressing real world business challenges making this a must read for professionals seeking to drive innovation and efficiency in their organizations You Will Gain a solid understanding of artificial intelligence deep learning and transformer architectures and how these concepts power generative AI Dive into SAP s innovative AI offerings exploring how the SAP BTP Generative AI Hub integrates generative AI and large language models safely into enterprise applications Understand how SAP s generative AI capabilities are embedded across its product suite including S 4 HANA CRM and HXM This book is for Enterprise IT Professionals and Developers Solution Architects Unlocking the Potential of OpenAI's ChatGPT DAVID YAO, Have you heard of OpenAI s ChatGPT but have no idea what it is or how to use it Look no further This book provides a comprehensive introduction to this revolutionary language model In this book the author takes you through the history of ChatGPT and its capabilities as well as its practical applications in fields such as customer service content creation and data analysis You ll also learn how ChatGPT works and what sets it apart from other language models But that s not all the book also provides hands on examples and tutorials to help you put your newfound knowledge into practice The author will also address the limitations of the model and provide tips on how to achieve optimal results Whether you re a data scientist business owner or student this book is a must read for anyone looking to understand and utilize the power of ChatGPT With its comprehensive understanding of ChatGPT and its potential to transform the way we work and learn this book is sure to be a valuable resource So why wait Get your hands on a copy today and let OpenAI s ChatGPT work for you **Proceedings of Topical Issues in International Political Geography (TIPG 2024)** Radomir Bolgov, Vadim Atnashev, Yury Gladkiy, Alexey Tsyb, Sergey Pogodin, Andrei Znamenski, Timo Duile, 2026-01-14 This proceedings book provides selections from the 2024 Topical Issues in International Political Geography TIPG meeting This book addresses the main issues of contemporary political geography and international relations providing a platform for discussion and collaboration between an international array of experts primarily in the

fields of political geography geopolitics and international relations The first section of this volume focuses on international relations with an explicit grounding in geographic space The second section then presents contributions that examine globalization and regionalism highlighting a historical framework for geography and politics Moving to an even more granular focus the third section presents chapters evaluating national policies and political institutions and the fourth introduces specific cases that illustrate culture as a factor of geography Finally contributions in the fifth section return to the macro scale discussing theoretical and historical issues at the intersection of politics geography and discourse

Introduction to Generative AI, Second Edition Numa Dhamani, 2026-01-13 Get up to speed quickly with generative AI AI tools like ChatGPT and Gemini automated coding tools like Cursor and Copilot and countless LLM powered agents have become a part of daily life They've also spawned a storm of misinformation hype and doomsaying that makes it tough to understand exactly what Generative AI actually is and what it can really do Introduction to Generative AI Second Edition delivers a clearly written survey of generative AI fundamentals along with the techniques and strategies you need to use AI safely and effectively In this easy to read introduction you'll learn How large language models LLMs work How to apply AI across personal and professional work The social legal and policy landscape around generative AI Emerging trends like reasoning models and vibe coding Introduction to Generative AI Second Edition guides you from your first eye opening interaction with tools like ChatGPT to how AI tools can transform your personal and professional life safely and responsibly This second edition has been completely revised to reflect the latest developments in the field from the latest innovations in prompt engineering and AI agents to fresh coverage of multimodal training reasoning models no code tools retrieval augmented generation RAG and more About the book Introduction to Generative AI Second Edition is an up to date guide to the capabilities risks and limitations of tools like ChatGPT Gemini and Claude This easy to follow guide moves quickly through the basics giving you the skills and understanding to use AI with confidence Along the way you'll explore how AI is impacting even established industries with an expert level look at global investment in AI AI education policy AI's economic impact and the ongoing legal and ethical issues of AI usage About the reader For anyone interested in generative AI No technical experience required About the author Numa Dhamani is a natural language processing expert working at the intersection of technology and society Maggie Engler is an engineer and researcher currently working on safety for large language models

**Mastering AI for Strategic Business Success** Jonas Debrulle, Loïc Plé, Elliroma Gardiner, 2025-10-14 In the rapidly evolving landscape of modern business artificial intelligence AI has emerged as a transformative force redefining how organizations operate compete and thrive The advent of AI has introduced unprecedented opportunities and challenges compelling business leaders to navigate a complex intersection of technology and strategy This book provides readers with the tools and perspectives necessary to harness the power of AI responsibly ethically and effectively ultimately driving strategic business success It is an indispensable and comprehensive resource for anyone seeking to understand the

strategic implications of AI its role in shaping the future of business and how to leverage AI for strategic advantage Key Features Designed with alternating strategy and technology focused chapters that are tightly interwoven the text provides A clear integrated framework that links AI technologies directly to core strategic business decisions and operational actions Cutting edge case studies and examples illustrating how organizations across sectors are deploying AI to gain a competitive edge Companies discussed include amongst others Netflix Amazon Spotify Ocado the Adecco Group 9altitudes NatWest Group and AlterEos Pedagogical tools such as learning objectives real world examples and applications of AI and in depth discussions of technical aspects of AI support comprehension critical thinking and classroom discussion Digital support via McGraw Hill s Connect platform offering data driven simulations videos case studies and a wide bank of test questions for enhanced learning and engagement Dr Jonas Debrulle is a Professor at I SEG School of Management in France and the Faculty of Economics and Business at KU Leuven in Belgium Previously he was Director of Programs at I SEG overseeing undergraduate and postgraduate programs He currently teaches international strategic management technology entrepreneurship and the impact of AI on business development Dr Lo c Pl is a Professor of Strategic Management and Director of Teaching and Learning at IESEG School of Management He has a Ph D in Management Sciences from University Paris Dauphine PSL He created I SEG Center for Educational and Technological Innovation CETI in 2009 promoting the use of technology to benefit teaching and learning Dr Elliroma Gardiner is an Organisational Psychologist and Associate Professor at QUT Business School in Australia With over 18 years of experience teaching and researching across Australia Asia and Europe she has held academic positions at the London School of Economics I SEG School of Management and Griffith University

**ICT for Intelligent Systems** Jyoti Choudrie,Eva Tuba,Thinagaran Perumal,Amit Joshi,2026-01-01 This book gathers papers addressing state of the art research in all areas of information and communication technologies and their applications in intelligent computing cloud storage data mining and software analysis It presents the outcomes of the 10th International Conference on Information and Communication Technology for Intelligent Systems ICTIS 2025 held in New York USA The book discusses the fundamentals of various data analysis techniques and algorithms making it a valuable resource for researchers and practitioners alike

*Simulation Modeling and Analysis, Sixth Edition* Averill M. Law,2025-02-21 Comprehensive state of the art coverage of every important simulation technique This fully revised book has the most comprehensive and up to date coverage of all aspects of a simulation study Equally well suited for use in university courses simulation practice and self study the book offers clear and intuitive explanations as well as 300 figures 218 examples and 217 problems You will get detailed discussions on modeling and simulation simulation software model verification and validation input modeling random number and variate generation statistical design and analysis of simulation experiments experimental design simulation optimization agent based simulation machine learning and much more Authored by an operations research analyst and industrial engineer with more than 40 years of experience Simulation Modeling and

Analysis is widely regarded as the bible of simulation and now has more than 178 000 copies in print and 23 700 citations This sixth edition has been streamlined with several chapters downsized to eliminate outdated simulation programs or statistical techniques that are rarely used in practice and are unnecessarily complicated Most analyses of simulation output data can now be done using three simple and familiar statistical formulas or expressions A new chapter covers AI and machine learning and their application to simulation Covers what are arguably the three most innovative and popular simulation software packages AnyLogic FlexSim and Simio Includes a set of instructor s resources Has been used at universities such as University of California Berkeley Stanford Georgia Tech Michigan Cornell Purdue Virginia Tech Penn State Wisconsin Columbia Texas A M Washington and Johns Hopkins Written by a world class expert in the field and an experienced educator who has presented more than 550 simulation and statistics short courses in 20 countries 2 The Last Invention The Impact Of Advanced Ai Francisco Jerbesson De Freitas Morais,2026-01-15 The Last Invention The Impact of Advanced Artificial Intelligence Humanity has always moved forward by creating tools But for the first time it has created something capable of thinking learning and deciding In The Last Invention readers are taken on a deep clear and forward looking exploration of the rise of advanced artificial intelligence and its irreversible consequences for civilization The book examines how AI has evolved from a simple technological tool into a global cognitive infrastructure transforming education labor economics governments art science and even the human mind itself With accessible language and strong technical rigor the work explores the historical evolution of artificial intelligence how neural networks and large language models truly function the rise of multimodal generative AI the direct impact of AI on the global economy professions and geopolitical power and the ethical social and human limits of this transformation Moving beyond both technological hype and dystopian fear the book presents a central argument the greatest risk of AI is not the machine itself but how humanity chooses to use it By addressing themes such as expanded cognition digital exclusion inclusive interfaces augmented humans and mental sovereignty the book reveals that AI can become either the greatest instrument of inclusion ever created or the most sophisticated mechanism of inequality in human history The Last Invention is AI Agents and Applications Roberto Infante,2026-03-24 AI powered applications are rapidly becoming the new normal Personal productivity assistants coding agents smarter search and automated reporting tools are popping up everywhere The LangChain ecosystem and standards like MCP are driving this new gold rush This book helps you claim your spot This is your hands on guide to creating real production ready language model solutions With LangChain and LangGraph you ll orchestrate powerful agentic workflows and build dynamic tool based agents that can search summarize reason and act You ll move from essential prompt engineering to advanced Retrieval Augmented Generation RAG and finally to deploying multi agent systems using modern integration standards like the Model Context Protocol MCP In AI Agents and Applications With LangChain LangGraph and MCP you ll discover Prompt and context engineering for accurate hallucination resistant systems Advanced RAG for

summarization semantic search and reliable Q A Structured multi step agentic workflows with LangGraph Tool based agents that adapt in real time Multi agent systems for complex real world tasks MCP integration to expose compose and consume plug and play tools About the technology This book teaches you to design reliable LLM powered systems by focusing on the concepts architectures and design patterns that will stay stable even as models and APIs change You ll learn to structure prompts compose modular chains and build RAG pipelines that ingest documents split them into chunks embed them retrieve the right context and ground answers to eliminate or vastly reduce hallucinations About the book Along the way you ll build concrete applications summarization and Q A engines context aware chatbots with memory and tool using AI agents that orchestrate multi step workflows with branching logic For the examples the book uses Python LangChain LangGraph and LangSmith but you ll be able to generalize to other frameworks You ll understand with clarity and confidence how to keep integrations maintainable manage context limits and cost latency tradeoffs and evaluate debug and monitor behavior so your systems work in production About the author Roberto Infante is an AI innovator with deep FinTech experience working for a London based hedge fund He specializes in building agentic systems for both plain vanilla and exotic quantitative analysis

**A Review of Recent Advancements in Deep Reinforcement Learning** Artur Sahakjan,2018-08-02 Bachelor Thesis from the year 2018 in the subject Computer Science Commercial Information Technology grade 1 0 University of Duisburg Essen language English abstract Reinforcement learning is a learning problem in which an actor has to behave optimally in its environment Deep learning methods on the other hand are a subclass of representation learning which in turn focuses on extracting the necessary features for the task e g classification or detection As such they serve as powerful function approximators The combination of those two paradigm results in deep reinforcement learning This thesis gives an overview of the recent advancement in the field The results are divided into two broad research directions value based and policy based approaches This research shows several algorithms from those directions and how they perform Finally multiple open research questions are addressed and new research directions are proposed

**Natural Language Processing in Action, Second Edition** Hobson Lane,Maria Dyshel,2025-02-25 Develop your NLP skills from scratch with an open source toolbox of Python packages Transformers Hugging Face vector databases and your own Large Language Models Natural Language Processing in Action Second Edition has helped thousands of data scientists build machines that understand human language In this new and revised edition you ll discover state of the art Natural Language Processing NLP models like BERT and HuggingFace transformers popular open source frameworks for chatbots and more

You'll create NLP tools that can detect fake news, filter spam, deliver exceptional search results, and even build truthfulness and reasoning into Large Language Models (LLMs). In *Natural Language Processing in Action, Second Edition*, you will learn how to process, analyze, understand, and generate natural language text. Build production-quality NLP pipelines with spaCy. Build neural networks for NLP using PyTorch, BERT, and GPT transformers for English composition, writing code, and even organizing your thoughts. Create chatbots and other conversational AI agents. In this new and revised edition, you'll discover state-of-the-art NLP models like BERT and HuggingFace transformers, popular open-source frameworks for chatbots, and more. Plus, you'll discover vital skills and techniques for optimizing LLMs, including conversational design and automating the trial and error of LLM interactions for effective and accurate results. About the technology: From nearly human chatbots to ultra-personalized business reports to AI-generated email, news stories, and novels, natural language processing (NLP) has never been more powerful. Groundbreaking advances in deep learning have made high-quality open-source models and powerful NLP tools like spaCy and PyTorch widely available and ready for production applications. This book is your entrance ticket and backstage pass into the next generation of natural language processing.

About the book: *Natural Language Processing in Action, Second Edition* introduces the foundational technologies and state-of-the-art tools you'll need to write and publish NLP applications. You learn how to create custom models for search translation, writing assistants, and more, without relying on big commercial foundation models. This fully updated second edition includes coverage of BERT, HuggingFace transformers, fine-tuning large language models, and more. What's inside: NLP pipelines with spaCy, neural networks with PyTorch, BERT and GPT transformers, conversational design for chatbots.

About the reader: For intermediate Python programmers familiar with deep learning basics.

About the author: Hobson Lane is a data scientist and machine learning engineer with over twenty years of experience building autonomous systems and NLP pipelines. Maria Dyshel is a social entrepreneur and artificial intelligence expert and the CEO and cofounder of Tangible AI. Cole Howard and Hannes Max Hapke were co-authors of the first edition.

[No Prize for Pessimism](#) by Sam Schillace, 2026-03-24

*No Prize for Pessimism* by Sam Schillace is a thoughtful meditation on the importance of optimism in building and designing tech products or any product for that matter. Schillace is Microsoft's Deputy Chief Technology Officer. He is the co-inventor of Google Docs, a product used by more than a billion people around the world. Through a series of insightful letters and reflections, Schillace shares his journey from the early days of personal computing to the forefront of AI innovation. This book delves into the mindset required for disruption and innovation, emphasizing the importance of optimism, experimentation, and a willingness to embrace the messiness of creation. In his debut as an author, Schillace argues that optimism is crucial for innovation, contrasting it with the dangers of a pessimistic mindset, which he believes stifles creativity and progress. Leadership, according to Schillace, is rooted in humility and trust. He warns against the prima donna death spiral, where leaders fail to delegate, leading to team inefficiency. The author discusses the transformative potential of AI, emphasizing the need to

integrate AI capabilities with traditional coding practices for effective product development He explores the balance between speed and maintainability in coding advocating for a pragmatic approach to software development Schillace stresses the importance of humility in leadership encouraging leaders to support their teams and prioritize collective success over personal ego He identifies several emerging technologies with disruptive potential including AI quantum computing and renewable energy solutions Throughout the author encourages readers to adopt a What if mindset fostering creativity and resilience in the face of challenges Schillace shares personal anecdotes and lessons learned throughout his career offering practical advice for aspiring innovators and leaders No Prize for Pessimism is perfect for entrepreneurs engineers and anyone interested in the future of technology

**Project Maven** Katrina Manson,2026-03-24 The dramatic story of the secretive decade long Pentagon campaign to deliver America into the age of AI warfare In 2017 a small crew gathered in a windowless Pentagon room to put AI at the heart of how America makes war Led by Drew Cukor an unyielding Marine Corps colonel driven by the deaths of US troops and the prospect of war with an AI equipped China the Project Maven team raced to send AI into combat igniting controversy and forever changing the US military Summoning the mayhem of a tech startup the Maven team wrestled Pentagon bureaucrats and each other They enlisted an initially reluctant Silicon Valley supercharged the growth of Palantir and sent algorithms made by Amazon Microsoft and others into hot wars Maven fielded technology to identify targets at speed and scale developed AI infused command systems and learned where AI fails The prospect of machines making independent decisions about life and death alarmed members of the military across all ranks and the project sparked a revolt among thousands of tech workers at Google Yet today Maven s AI enabled systems operate in every branch of the US military and its lessons are folded into developing autonomous technology set to be on the front lines of future war Project Maven and its legacy sit at the intersection of colliding trends America s insecurity about declining global power the technological revolution driving AI into every aspect of society the dominance of Big Tech all encompassing surveillance and the ambitions of China s growing military As the second Trump administration pours money into military AI and autonomy while the UN Secretary General clamors for a ban on killer robots this book investigates whether AI will improve accuracy and save lives or if a fundamentally unreliable black box technology will unleash mistakes and atrocities at scale Drawing on more than 200 interviews with insiders and opponents this compelling narrative tells the definitive story of how AI warfare once the stuff of apocalyptic science fiction has become a reality

Open AI in Flux Emerald Lawson,2023-11-22 In the ever evolving landscape of artificial intelligence OpenAI stands as a beacon of innovation and progress OPEN AI IN FLUX NAVIGATING THE RECENT TIDES OF CHANGE offers an in depth exploration of the latest developments and transformations at OpenAI This comprehensive guide takes you on a journey through the intricate workings of OpenAI shedding light on its recent advancements research breakthroughs and the impact it has on the world of AI The book delves into the organization s mission its pioneering research in artificial general intelligence AGI and how it is

shaping the future of AI Whether you re an AI enthusiast a researcher or someone intrigued by the potential of AGI this book provides a valuable insight into the dynamic world of OpenAI It captures the essence of the organization s commitment to ensuring AGI benefits all of humanity and offers a unique perspective on the transformative power of AI Discover the exciting world of OpenAI and navigate the tides of change in AI with this enlightening read Get your copy today and embark on an intellectual adventure into the heart of OpenAI

**How did Stanford continue to foster growth in Silicon Valley during the early 2000s?** ,2025-10-01 Pre University Paper from the year 2024 in the subject Business economics Miscellaneous grade 1 0 language English abstract This research paper examines the symbiotic relationship between Silicon Valley and Stanford University and its impact on the startup scene in the early 2000s San Francisco Bay Area Furthermore a historical analysis of Stanford and Silicon Valley focuses on the deepened relationship these two entities have set up Additionally many companies that originated in Silicon Valley and have changed the world will be recognized Lastly the motivations and future directions of the Valley and Stanford will be explained The rise of massive open online courses MOOCs by universities such as Harvard and MIT sends knowledge at no cost and might change the Valley for the time to come

**The Human Use of Human Beings** Norbert Wiener,2025-08-12 For the 75th anniversary a new edition of The Human Use of Human Beings the landmark book that delves into the relationship between humans and computers and presciently anticipates many contemporary dilemmas surrounding AI technology With a new introduction by Brian Christian author of the bestselling Algorithms to Live By and The Alignment Problem In 1950 mathematician philosopher Norbert Wiener ended this classic book on the place of machines in society with a warning We shall never receive the right answers to our questions unless we ask the right questions The hour is very late and the choice of good and evil knocks at our door Wiener the founder of the science of cybernetics the study of the relationship between computers and the human nervous system was widely mislabeled as an advocate for the automation of human life As The Human Use for Human Beings reveals his vision was much more complex and interesting and is more relevant in today s world of AI than anyone could have anticipated In his new introduction Brian Christian aptly calls Wiener the progenitor of contemporary AI safety discourse Wiener hoped that machines would release people from relentless and repetitive drudgery to achieve more creative pursuits yet he anticipated the danger of dehumanizing and displacement His pioneering views on the human machine relationship as a communicative process are only more crucial now as we carry in our pockets AI devices that we can literally speak to His prescient warnings illuminate our contemporary relationships with language art and even social media The Human Use of Human Beings examines the implications of cybernetics for education law language science technology as Wiener anticipates the enormous impact in effect a third industrial revolution that the computer has had on our lives

[Deep Learning with JAX](#) Grigory Sapunov,2024-12-03 Accelerate deep learning and other number intensive tasks with JAX Google s awesome high performance numerical computing library The JAX numerical computing library tackles the core performance challenges

at the heart of deep learning and other scientific computing tasks By combining Google s Accelerated Linear Algebra platform XLA with a hyper optimized version of NumPy and a variety of other high performance features JAX delivers a huge performance boost in low level computations and transformations In Deep Learning with JAX you will learn how to Use JAX for numerical calculations Build differentiable models with JAX primitives Run distributed and parallelized computations with JAX Use high level neural network libraries such as Flax Leverage libraries and modules from the JAX ecosystem Deep Learning with JAX is a hands on guide to using JAX for deep learning and other mathematically intensive applications Google Developer Expert Grigory Sapunov steadily builds your understanding of JAX s concepts The engaging examples introduce the fundamental concepts on which JAX relies and then show you how to apply them to real world tasks You ll learn how to use JAX s ecosystem of high level libraries and modules and also how to combine TensorFlow and PyTorch with JAX for data loading and deployment About the technology Google s JAX offers a fresh vision for deep learning This powerful library gives you fine control over low level processes like gradient calculations delivering fast and efficient model training and inference especially on large datasets JAX has transformed how research scientists approach deep learning Now boasting a robust ecosystem of tools and libraries JAX makes evolutionary computations federated learning and other performance sensitive tasks approachable for all types of applications About the book Deep Learning with JAX teaches you to build effective neural networks with JAX In this example rich book you ll discover how JAX s unique features help you tackle important deep learning performance challenges like distributing computations across a cluster of TPUs You ll put the library into action as you create an image classification tool an image filter application and other realistic projects The nicely annotated code listings demonstrate how JAX s functional programming mindset improves composability and parallelization What s inside Use JAX for numerical calculations Build differentiable models with JAX primitives Run distributed and parallelized computations with JAX Use high level neural network libraries such as Flax About the reader For intermediate Python programmers who are familiar with deep learning About the author Grigory Sapunov holds a Ph D in artificial intelligence and is a Google Developer Expert in Machine Learning The technical editor on this book was Nicholas McGreivy Table of Contents Part 1 1 When and why to use JAX 2 Your first program in JAX Part 2 3 Working with arrays 4 Calculating gradients 5 Compiling your code 6 Vectorizing your code 7 Parallelizing your computations 8 Using tensor sharding 9 Random numbers in JAX 10 Working with pytrees Part 3 11 Higher level neural network libraries 12 Other members of the JAX ecosystem A Installing JAX B Using Google Colab C Using Google Cloud TPUs D Experimental parallelization **Managing and Using Information Systems** Keri E.
